

CHART LOG

Symbol Explanations

⑩ Top Ten Hit ① Number One hit.

◆ Indicates that the record probably sold more than 250K. Only used on unsorted charts.

Unsorted chart hits will have no position, but if they are black in colour than the record made the Real Chart. Green coloured records might not have made the Real Chart. The same applies to the red coloured hits, these are known to have made the USA charts, so could have been released in the UK, or imported here.

Date of Entry

The Charts were produced on a Sunday and the sales were from the previous seven days, with the exception of Christmas when no chart was produced. All sales from that week was carried over to the first chart of the new year. There are some Christmas period charts however, these being due to very high sales. The week beginning dates is used throughout and not the week ending one. So a date of 12 Jun 60 covers sales 5/6/60 to 11/6/60. The week ending would thus be for this chart 18/6/60.

⌚ Still in the chart after 19/12/99. Those with this symbol may not have achieved their highest position and not have a full sales total, plus it wont have completed its chart life. Subsequent years have been added, but as yet these overrun tracks have not been updated.

Sales System

⊙ Indicates sales of 250,000 to 499,999 copies sold while in the chart only.

▣ Indicates sales of 500,000 to 999,999 copies sold while in the chart only.

ⓘ Indicates sales of 1,000,000 copies sold while in the chart only. Another symbol will be added for each subsequent 1,000,000 copies sold. No indication is shown for sales inbetween each million copies sold after the first.

⌚ This with one of the above sales symbols indicates accumulative sales from previous and present entry (re-entries only). Note not fully employed.

Sales symbols of some hits before the nineties are not included, due to the data not being processed yet.

The B.P.I. system of metal disc sales should not be confused with the above system of sales. Having said that the above sales measures were used in the seventies, by the B.P.I., though anyone can have a 'metal' disc done for any number of sales quite legally. The lower category of B.P.I. sales (200,000) does not apply here. Of course this does not mean that a record did not sell that figure and acts should not be disappointed if that is the case. All other B.P.I. categories are covered by the above.

Format

Record company labels and numbers are not listed. This is because the original recording released in the U.K. may not be the one that was sold in some cases and it would be misleading to list, say, the CD number, when the track may have sold more on cassette. No format rules apply and all types were included from the point of first sales and until they became obsolete, such as the 78! Since the emergence of downloads the AA single has

become a problem. Being that since each track can sometimes be released as a separate download. However if it is known that a track is being released on 'hard copy' as a AA side, then the tracks will be grouped as one, or as soon as known.

For the above reasons many remixed songs are listed as re-entries, however if the title is altered to reflect the remix it will be listed as would a new song by the act. This does not apply to records still in the chart and the sales of the mix would be added to the track in the chart. This may push singles back up the chart or keep them around for longer, nevertheless the chart is a sales chart and NOT a popularity chart on people's favourite songs or acts. Due to encryption decoding errors some artists/titles may be spelt wrong, I apologise for any inconvenience this may cause.

The chart statistics were compiled only from sales of SINGLES each week. Not only that but every single sale no matter where it occurred! Format rules, used by other charts, were unnecessary and therefore ignored, so you will see EP's that charted and other strange records selling more than other charts. Bear in mind that some singles were not released in Britain and as long as they were classed as SINGLES they count if sold here. Many pirated singles were bought by the public and they have been counted along with the rest. Unless they didn't work! Cassette Singles were easy to copy and you wouldn't know the difference if it was copied on to cassette from CD. This Chart counted them. After all a sale is a sale no matter who buys it, well not really if it's bought by the record company that's a cheat, so this chart ignored them and also stolen copies from the shops. Copying is illegal and it's killing the Music Industry, and it's growing from 1997 the REAL CHART started counting more fake (home made in some cases) CD singles being sold to other people. It detected vast sales of so-called limited edition ones too! Then there are records which should not even be in the shops still being sold. Illegal downloads count too, but only if they occur a fee (even if it is hidden). FREE downloads again do not count, nor does streamed music, or Radio Airplay. Karaoke tracks are generally excluded. And spoken word is never included, unless it over music and could be classed as a music track.

Chart dates

The compilers did the first chart on Sunday the 11 January 1948 it also included the sales for the 4 January too! It was a top 40 and was only 78 rpm records at that time. It stayed a top 40 till 3 January 1960 when it became a top 100 and has stayed that way since. It's interesting to note that the 3/1/60 top 100 only included sales for the previous 7 days and top 40 sales figures for the missing week. This was to balance out the top 40 in the new top 100 and not allow the outsiders (of the top 40 in the missing week) of the previous week a boost into the 40, due to two weeks sales.

Artist information

Most of the information comes from Google or Wikipedia.

I would like to thank the following:

Record Mirror, Music Week, Smash Hits, Number One, Melody Maker, N.M.E., Music papers, who have made it easier to compile these chart logs (mostly spelling names). Special thanks to the chart compilers themselves, for giving me solo access to the chart information and letting me explain the system they use.

MANTOVANI & his Orchestra

Anglo-Italian Annunzio Paolo Mantovani was an orchestra leader who made heavy use of cascading strings to create a definite signature sound...a lush sound. Active for five decades, his career received a positive boost as a result of the Second World War. Here, refined recording techniques in aid of the war effort at the Decca studios facilitated enhanced sound production to their record releases which was of particular benefit to the Mantovani sound.

Tony MARTIN

US vocalist of Jewish extraction who was a staple of American radio during the 1940s and 1950s. Also appeared in a number of Hollywood musicals at the same time, but despite all these (considerable) accomplishments is probably more famous – and definitely more well-regarded – as the husband of Cyd Charisse.

Tony MARTIN with The SKYROCKETS Orchestra

Tony Martin, was an American actor and singer died: July 27, 2012. Plus The Skyrockets, the super pit band of the London Palladium, directed first by Paul Fenhoulet and later by Woolf Phillips. This was the band which, in 1949, accompanied Benny Goodman for his first ever performances in Britain and surprised the maestro by its enormously high standard of efficiency and understanding of the jazz idiom. Three of the regular members were Les Lambert, Reg Sergeant (Drums) and Pat Dodd (Piano).

MILLS BROTHERS

That's John junior, Herbert, Harry & Donald. African-American jazz & pop group originally marketed as 'The Four Kings of Harmony' who were popular during the 1930s, 1940s & 1950s. Famous for developing the acapella form of musicianship where the human voice replaced instrument. On their discs the guitar was the only authentic sound. All other instrumental sounds were vocal impersonations.

Kylie MINOGUE & Jason DONOVAN

Minogue and Donovan both appeared on the Australian TV series Neighbours but before they recorded together, Minogue had left the series to concentrate on a music career. Stock, Aitken & Waterman had composed and written a song for the singer's so they could sing a duet.

MOTÖRHEAD

Motörhead were an English rock band formed in June 1975 by bassist, singer, and songwriter Lemmy Kilmister, who was the sole constant member. The band is often considered a precursor to, or one of the earliest members of, the New Wave of British Heavy Metal. Lemmy died on 28 December 2015.
