

## Do you notice the freeware from SothinkMedia--- Sothink Free Movie DVD Maker

SothinkMedia Product line includes not only Shareware but also freeware. Now I will introduce the most important freeware to you, that is [Sothink Free Movie DVD Maker](#).

### First is the appearance.

Sothink Free Movie DVD Maker is a standalone software, different from the others such as DVD Copy and DVD Ripper that sharing the same package.

### Next is the function.

Sothink Free Movie DVD Maker is a completely freeware to make all videos to DVD ISO and file with DVD menu.

It enables users to produce high quality DVD ISO files or folders out of videos downloaded from internet, shot by camcorders, SLDRs, smart phones and tablets, etc

- ★ Turn MP4, MKV, AVI, MOV, WMV, FLV, M2TS, etc into DVD video
- ★ Save the final DVD video to computer HDD as ISO or DVD Folder
- ★ One built-in DVD menu template with customizable settings
- ★ Multi-threading, Multi-core CPU processing and HW acceleration
- ★ Upgradable to the paid version to remove watermark logo

### The following is How to use Sothink Free Movie DVD Maker

#### I Load Source Videos

To make your personal videos into a standard DVD video with Sothink Free Movie DVD Maker, you need to add the videos first simply by dragging and dropping them into the main interface; if there are multiple videos, you also need to adjust file sequence to decide the playback order.

## **II Setting the Menu**

Next, you can add a menu to your final DVD video. There is only one menu template available, but it still lets you freely add, remove, change, and reposition any small decoration widgets. Or, you also can choose not to have the menu, so that you can play the DVD video straight forward.

## **III Customize Other Details**

Before initiating the conversion, take your time to give your final DVD video a favorite title, and also select an aspect ratio. In case you want to burn the DVD video at a later time with other 3rd party burning tools, you need to mind the PAL and NTSC difference.

Do you want to see the output quality and the processing speed, just download and have a try.
