Summary

Highly self-motivated student constantly working towards being an efficient, knowledgeable full-stack programmer. Working in teams and interfacing directly with clients are both familiar and welcome challenges.

Highlights

- WordPress Theme Development (PHP)
- Hybrid Mobile App Development (AngularJS)
- Native Mobile App Development
- ASP.Net (C#)
- Front and backend Web Development (HTML, CSS, Javascript, PHP, Python)
- Project Organization (Trello, Slack)
- Working in teams using source control systems (Git, GitLab, GitHub)
- Photoshop and other design tools (wireframes)

Experience

02/2016 - 08/2016 iwerk — Royal Oak, Michigan
Software Development Intern

An extremely lean private software development firm with experience meeting clients' needs since 1991.

- Taking on any and all responsibilities that a normal full-time developer would be expected to
- Expected to be able to quickly learn new languages, frameworks etc. with very little notice depending on the specific project
- Taking on the sole developer role for multiple projects
- Interacting with clients as a sole developer and as a part of a team
- Working together with fellow developers as well as project managers using workflow tools like Git, GitLab, Trello etc.

08/2015 - 02/2016 Raytheon Professional Services — Troy, Michigan
Software Quality Assurance Intern

Software development company specialized in occupational software used in the automotive industry

- Debugging and platform testing software across multiple operating systems and mobile platforms
- Designing and developing work automation software using python
- Reimagining and updating proprietary software as server systems were updated and prior software became inoperable
- Interfacing with fellow employees as well as clients frequently

Education

2018 Oakland University — Rochester, Michigan, United States
Bachelor of Science: Computer Science
