- CSS

- Node.JS
- ExpressJS
- AngularJS
- Ruby on Rails

- SQL
- Postgresql
- MongoDB

Mocha

Git

Github

Heroku

jQuery

AJAX

JSON

Bootstrap

Handlebars

AndroidSDK

Google Search

### My Objective

My objective is to find an exciting and challenging environment to expand on my current skill sets while contributing towards company goals. I'm energetic, enthusiastic and self-motivated on both collaborative and individual projects. I'm looking for a forward thinking company that is willing to take a chance and swap seasoned experience for an enthusiastic recruit.

### Experience

TEKE Machine Corp, Rochester, NY | Information Technology | June 2007 – August 2012  
My duties included creating and maintaining a DNC (direct numeric control) network for the company's various production machines. The DNC network allowed for the archival and redistribution of proven successful codes sent directly to the machines from a central server. Along with this duty I also created and maintained the interoffice network and performed various IT jobs such as data backup, computer repair, software installations, website maintenance and oversaw the company's production software which tracked the progress of the parts through the various stages of manufacturing.

### Freelance Projects

#### Massachusetts Pet Fox Legalization

An online petition where users can register their contact information towards changing state law regarding fox ownership. Ruby on Rails, Javascript, Html, CSS, Flexbox.

<http://petfoxpetition.herokuapp.com/>

#### Play4Free

Community driven online list of free games from across the net where registered users can add to the database. ActiveRecord, Ruby, Rails, Javascript, HTML, CSS, Ajax, Javascript, Devise with Omniauth.

<http://peter-white.github.io/play4free-githubpages/>

#### Group Project | Nozama

Mock shopping site created by four people as a way for users to purchase organic products. My focus was creating and implementing a user contributed data base for inventory items using Node.js /Mongoose/Express, MongoDB, Javascript, and Jade templates.

#### Portfolio | The White Zone

My portfolio website / Twilight Zone love letter that features my list of skill sets, my contact information, my projects with links, and a working message post function where registered users can post a message to the front page. Node.js, ExpressJS, MongoDB, jQuery, AJAX, Jade template, Javascript, and Passport.

### Education

General Assembly Web Development Immersive | April 2015 – July 2015

General Assembly WDI is a 12 week full time full stack web development course. The dense curriculum results in 12 hour days of coding in various languages, either alone, in a group, or pair programming. The course curriculum includes Javascript, Node.js, ExpressJS, Ruby on Rails, SQL, and Angular.

RampUp Program, Startup Institute, Boston, MA | 2014

Three month introduction to Ruby in both a classroom and workshop environment. Emphasis on creating both solo and collaborative projects.

Monroe Community College, Rochester, NY | 2009 - 2012

Associates of Science | Computer Systems Technologies

3.5 GPA, 2009-2012 Dean's List, Cisco Academy, Volunteer Worker for "Be The Match Bone Marrow Drive" 2009, 2011.

Finger Lakes Community College, Rochester, NY | presently completing Associates of Science | Computer Science.

### Interests

Gaming | Cinema | Animation
