5. Features and Explanations .....	
6. Troubleshooting .....	

# OVERJOINT

## HIGHNOON USERGUIDE

### INSTALLATION

Assuming that you have purchased the cheat and been processed, you will now be able to see a member only section on the forums, this is where the download for high noon is located. I have included a direct link below.

#### [Download Link](#)

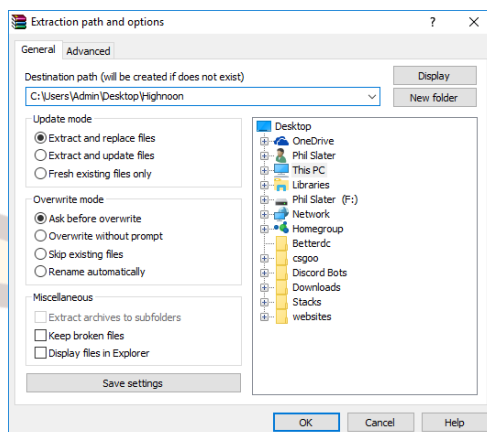

When you choose a version to download, your browser will ask you where to save the .zip file. Save this in a safe place as we will need to extract the files to be able to run the cheat.

When the file has finished downloading, you need to open the archive file. You may need additional software to access the archive, personally I use WinRAR, it's a free software and a popular option.

When you open the archive you should see this.

Name	Size	Packed	Type	Modified	CRC32
Local Disk					
WindowsInput.dll	22,528	8,523	Application extens...	20/08/2016 21:38	9057159E

Accord.Extensions.Core.dll	28,872	12,695	Application extens...	28/08/2016 18:38	F0270E57
Accord.dll	65,536	21,043	Application extens...	28/08/2016 18:38	4F616191

Next you need to extract all of the files to a local folder. To do this, click the Extract to button within WinRAR. You'll then be prompted to choose a directory to place the files in.

When you have chosen a directory, click OK and the files will be extracted. Navigate to the new folder and open it.

Assuming that you have followed the instructions correctly, you should see a folder like this.

Name	Date modified	Type	Size

Run the HighNoon\_2.0.0.0.exe file. You should now see the login screen. You can log into the cheat using your forum username and password. If you are using Windows 7, be sure to select windows 7 at the bottom right.

Your installation is now complete.
