

## **Welcome to Netmare.**

*We gladly would like to present you our IT catalogs.*

### About Us

Netmare is a group of highly experienced determined IT professionals. we started as freelancer in 2009 with 4 software engineers. today, we are 20+ tech folks, specialized in different technologies hitting tech market these days. we are surving 25+ national - international clients(80% International clients, mostly from USA and australia). Netmare is grooming very fast because of its returning customers. we serve best at least price and time stamp.

*Since, we all were freelancer in initial period. we had good connection with other developers from different technologies like java , asp .net and all. we then grabbed some good clients from freelancing platform . As team size grew up, we started building **ERPs**. e.g school management application as well as Human resource (HRM), Sales management ERP,*

*Now, we have team of 20+ well talented and highly experienced software geeks. we handle all kind of projects, from blogging to advanced integration of portal , AWS and Microsoft azure clouds hostings.*

Please go through our catalogs below....
