## 2. OffCAT to Solve Outlook Email Issue

There are certain configurations with Microsoft Outlook that might make you face certain issues related to the sending or the receiving of emails. But before this happens, you will get some symptoms. One of the causes is no immediate sending of email messages. These are kept in outbox for more than a minute.

You can find errors of synchronization log messages in folder related to sync issues. Another symptom is that you will not get email message in the inbox folder. When you transfer email message from other programs, you will get the error message. During the merging of mails, you will get an error message.
