

2017 ROAD MAP

Coinigy Inc - Digital Asset Intelligence

“Blockchain technology continues to redefine not only how the exchange sector operates, but the global financial economy as a whole”

– Bob Greifeld, CEO, Nasdaq

Introduction

We'd like to start by stating that we are truly honored to take part in this growing industry! It's hard to think that just a few years ago, Coinigy was simply an idea being discussed amongst a small group of digital currency enthusiasts.

In that time, we've gone through all the ups and downs of the rollercoaster that can only be described as entrepreneurship. We're incredibly happy with the work we've done, the relationships we've built, and are excited to present this 2017 Coinigy Road Map.

We're honored to be working alongside such an incredibly talented team, and are blessed to have such an active and dedicated user base. We couldn't do it without you, and we hereby pledge to continue towards the goal of providing the best, most reliable service for cryptocurrency traders, API aficionados, chartists, market watchers and blockchain purists alike.

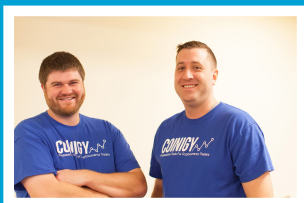

We look forward to a new year and are elated to be able to reveal some of the things we've been working on, under-the-hood.

Here's to another exciting year!

-Rob & William

Co-founders, Coinigy Inc
Milwaukee, WI

Security, Stability, Integrity

They're our core tenets, and with good reason. While this space is often considered the "wild west", we're doing our best to make considerable strides towards making cryptocurrency trading more secure and reliable.

◀ U2F Device Support

We are building U2F (Universal Second-Factor) Authentication directly into the platform.

This allows users to authenticate with hardware keys like Yubikeys and Trezor devices.

◀ Lockdown Links & Security Notifications

Users now have access to a unique link to immediately and safely prevent attackers from accessing their account. Additional security notifications are now active as well.

◀ Internal Security Overhaul

We have completely reworked our internal security policies moving forward, both for users and staff. Regular sitewide and internal audits are now a part of official policy.

Data Brokerage

The world's largest vault of historical cryptocurrency data is getting even bigger, and more accessible

With more than 5 billion historical datapoints, Coinigy's data vault has grown into the largest dossier of crypto data available. In 2017 we're adding new metrics including orderbook snapshots, fully parsed blockchain statistics, and making everything more affordable and accessible.

2,000+

Markets

DOWNLOADABLE T
MARKET DATA FOR THE

> 100

Coinigy provides historical market data on bitcoin and hundreds of alternative cryptocurrencies. Data is available in both RAW (Every Trade) and OHLCV (Open, High, Low, Close, Volume) format as a tab-delimited CSV file.

Blockchains

Things you'll love

More exchanges, more blockchains, new data categories. We'll be offering exclusive discounts and rewards for regular data consumers!

More Delivery Options

In addition to partnering with some large-scale data brokerages, we'll be offering new ways to quickly acquire the data you need, such as via desktop applications.

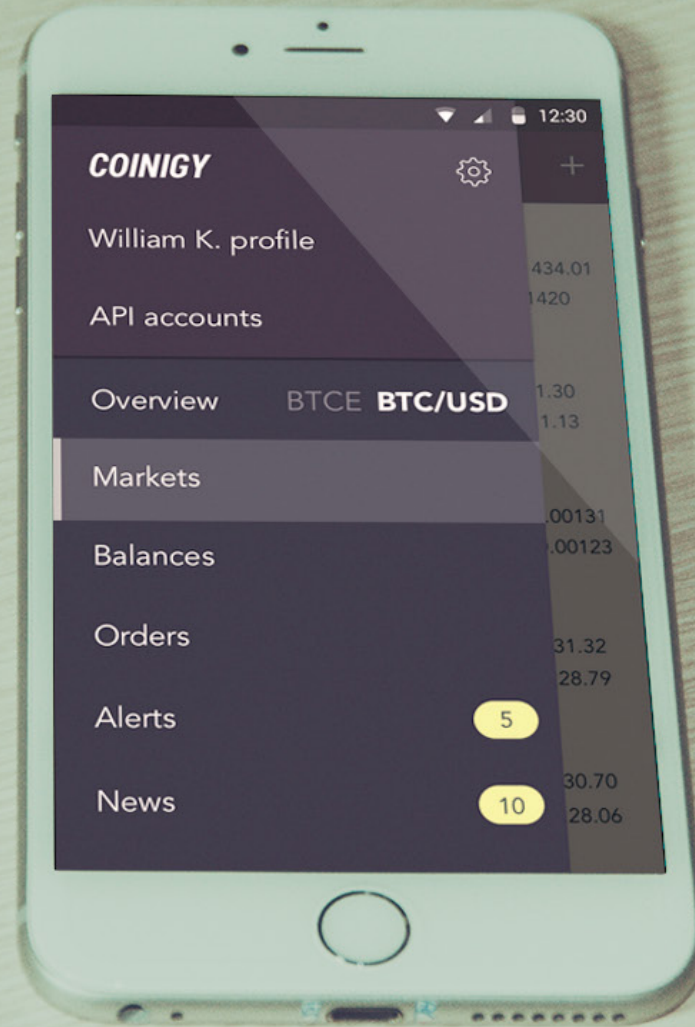

More Live Data

As part of our new initiative, we will be offering more real-time data into both of our REST and Websocket APIs.

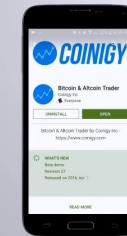

Coinigy on iPhone & iPad

Coinigy Comes To iOS

We're hard at work in the planning stages, making our popular Android app, **Bitcoin & Altcoin Trader** available to iOS users in 2017.

Project Atom

A new type of exchange, built exclusively for ease-of-use and seamless Coinigy integration

Lightweight

ReactJS, Websockets,
C#, HTTP/2 & More

Robust API

Seamless integration with
Coinigy & other platforms

Cryptomic Matching Engine

Highly Benchmarked & Battle-Tested

Available Q3 2017

Worldwide Beta Testing Program
Expected Q3

Development Progress

Project Atom

Atomic Real-Time Trade Engine For Ultra Fast And Accurate Order Matching

Fully-Featured Charting Library & Coinigy Integration

Social Trading, Voting, Live Chat & Messaging System

Multiple Security Features Including 4-Way Auth, Security Pins, Withdrawal Verifications

Multiple API Access Points Including HTTP & Websockets

Full Reserve, Real-Time Transparency of System Liquidity

2017 Development Initiatives

We've heard your feature requests, and we have big development plans for the Coinigy platform in 2017.

Complete rewrite from the ground up (Coinigy 2.0)

Modular platform with independent components

Android app improvements, introduction of iOS & responsive web

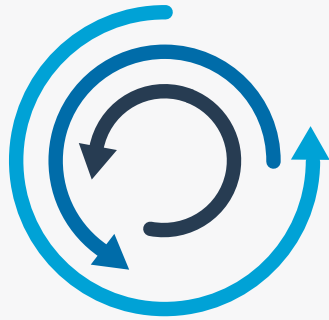

More exchanges & full trading integrations, incl. futures & margin

ChartScanner, SocialScanner, BlockExplorer, Portfolio Management, Tax Reporting

Coinigy 2.0 Progress

→	Back-End Refactoring	75%
→	Wireframing & UX	45%
→	Front-End Implementation	15%

Personal Trading Statistics

Community-Driven Apps

Institutional Features

Rewards

Earn tokens for contributing to the community and being an active user.

BlockExplorer

Access blockchain data directly through Coinigy and get real-time stats on many new metrics.
Overlay data directly on charts

ChartScanner

Set alerts based on studies, volume changes, price swings and blockchain metrics

SocialScanner

Track your favorite markets based on social mentions, news articles and gather intelligence with automatic sentiment analysis

Performance Monitoring, Cost-Basis Accounting & Tax Reporting

A full suite of accounting and performance tools for performance monitoring and compliance

Coinigy Suite

A full suite of tools to manage your crypto wealth at home or on the road.

Coinigy API

Real-Time Data on Every
Exchange, Market & Blockchain

Coinigy 2.0 Platform

A complete re-write with an
emphasis on performance

Project Atom

Cryptomic trade engine
Fast & Secure

Industry Partnerships

Tighter integration with exchanges
Introduce third party tools & data

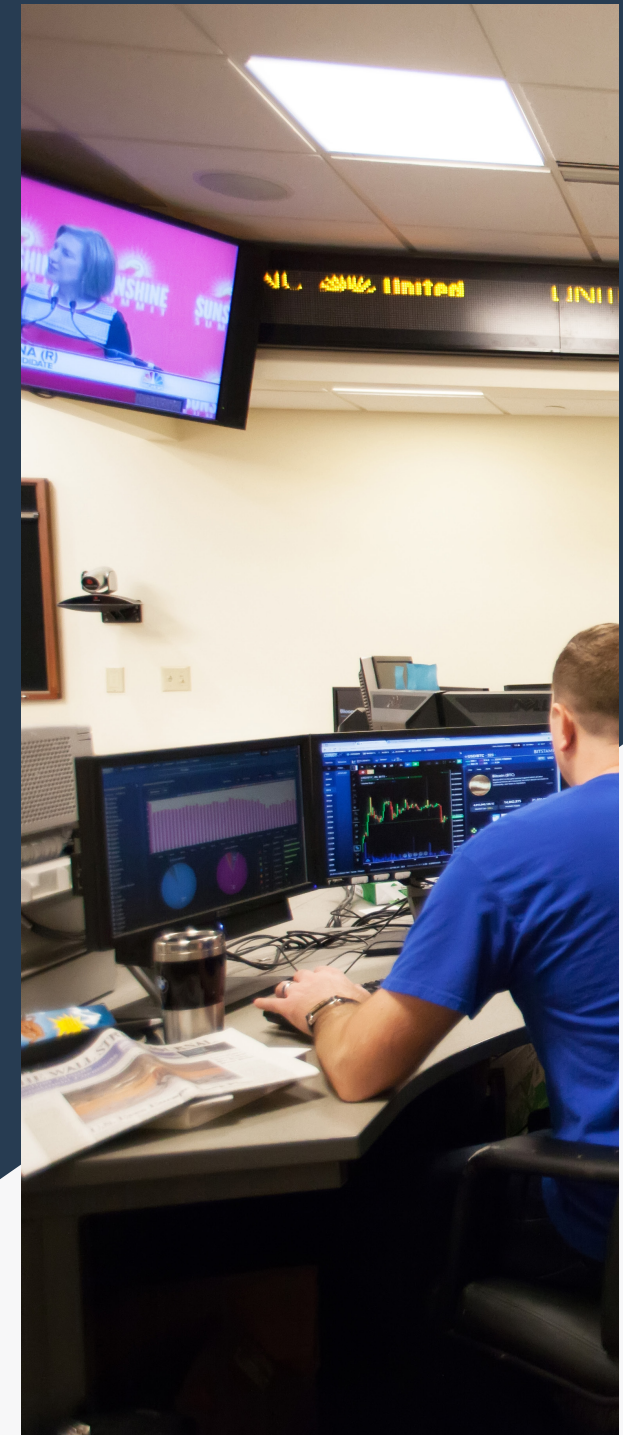

Institutional Accounts

Master/slave accounts, accounting
tools and compliance reporting

Historical Data

Available for direct download and
increased availability
