Record Business Research

All charts and listings in Record Business are produced by the paper's own research department, employing a staff of four and an ICL 1503/43 computer known as ARTHER-the Airplay, Retail, Television, Hit-Potential 8 Exposure Reactor.

The set-up is unique in Britain and is modelled on the approach used successfully for many years by the three major US trade papers, especially RB's associate publication, Record World.

All enquiries about RB Research should be made to the Research Manager, Godfrey Rust (01-836-9311).

Record Business Research

All charts and listings in Record Business are produced by the paper's own research department, employing a staff of four and an ICL 1503/43 computer known as ARTHER-the Airplay, Retail, Television, Hit-Potential 8 Exposure Reactor.

The set-up is unique in Britain and is modelled on the approach used successfully for many years by the three major US trade papers, especially RB's associate publication, Record World.

All enquiries about RB Research should be made to the Research Manager, Godfrey Rust (01-836-9311). The Record Rusiness Top 100 is compiled from sales and airplay on a system adapted from the charts of the successful US trade paper Record Wold The Top 30 is based on sales alone. Positions 31 100 are determined by the sales rating 4.5% of the airplay rating 300 shops report weekly sales, average reporting time being Thursday noon.

Record **Business** Research

All charts and listings in Record Business are produced by the paper's own research department, employing a staff of four and an ICL 1503/43 computer known as ARTHER-the Airplay, Hit-Potential Retail, Television, 8 Exposure Reactor.

The set-up is unique in Britain and is modelled on the approach used successfully for many years by the three major US trade papers, especially RB's associate publication, Record World.

All enquiries about RB Research should be made to the Research Manager, Godfrey Rust (01-836-9311).

The Number One Song In Heaven, Giorgio Moroder (Heath Levy/Island) 58

The Runner, Giorgio Moroder (Sando/Heath Levy) 11

All charts and listings in *Record Business* are produced by the paper's own research department, employing a staff of four and an ICL 1503/43 computer known as ARTHER—the Airplay, Retail, Television, Hit-Potential & Exposure Reactor.

The set-up is unique in Britain and is modelled on the approach used successfully for many years by the three major US trade papers, especially *RB*'s associate publication, *Record World*.

All enquiries about RB Research should be made to the Research Manager, Godfrey Rust (01-836-9311). The Record Business Top 100 is compiled from sales and airplay on a system adapted from the charts of the successful US riade paper Record World The Top 30 is based on sales alone Positions 31 100 are determined by the sales rating + 5% of the airplay rating 300 shops report weekly sales, average reporting time being Thursday noon

Wow, Andrew Powell (Kate Bush/EMI) 20

You Can't Change That, Ray Parker Jr. (Warner Bros) 79

Record Business Research

All charts and listings in Record Business are produced by the paper's own research department, employing a staff of four and an ICL 1503/43 computer known as ARTHER-the Airplay, Hit-Potential 8 Retail, Television, Exposure Reactor.

The set-up is unique in Britain and is modelled on the approach used successfully for many years by the three major US trade papers, especially RB's associate publication, Record World.

All enquiries about RB Research should be made to the Research Manager, Godfrey Rust (01-836-9311).

27
