

PRP treatment for hairs

Loosing excess hairs while combing? Worried about hair thinning? Well, it is a common problem that many people face. People are frightened and worried when they see that they are losing hairs in huge amount. This can make them feel uncomfortable and they can get stressed. For people who are very concerned about their hairs, seek out for the best possible way to treat the hairs. If you are among them, then it is definitely worthwhile to know about PRP therapy for hair loss solution.

What is PRP treatment?

Platelet Rich Plasma is a very popular and famous treatment for treating hair loss problem. It is a treatment that helps in controlling and treating of the excess hair loss. Since decades, people are practicing this procedure and are getting the best result of it. A procedure that helps you gain back the confidence and boost your self esteem.

Is PRP safe for hairs?

Lots of people are scared with the idea of getting PRP therapy for their hairs as it is a very unique technique. In the process of PRP, the patient's own blood is used to treat the hair loss. And as it is one's own blood, the treatment is absolutely safe. No side effects and it can be opted by anyone.

How are the procedure performed and the duration of treatment?

First of all the patient's blood is taken out about 15ml. Then it is centrifuged. This helps with separation of the platelets containing plasma. The platelet is then injected into the scalp with fine needles. This whole procedure can take about 45 minutes to an hour's time.

What are the downtime and precautions after PRP therapy?

After platelet rich plasma procedure, there can be little swelling on the scalp, but it goes away in a few hours. Apart from this, there is no major downtime. The precaution that needs to be taken is very simple. Combing and washing of the scalp and hair is to be avoided for a day. If you feel little pain, your dermatologist may prescribe you medicine.

If you think PRP therapy can help you and wish to go through the procedure, make sure you choose the best clinic. It is as important as making up your mind for PRP therapy.
