

UTC TIME TUTORIAL

To make a Massed Attack on an enemy Bastion or Presidio more effective, it is important for all Massed Attackers troops to arrive at the target at the same time. To accomplish this successfully, everyone must know how to calculate the correct UTC time in relation to the time zone they reside in.

UTC is the time standard commonly used across the world. The world's timing centers have agreed to keep their time scales closely synchronized - or coordinated - therefore the name Coordinated Universal Time.

Link to current UTC time: <https://www.timeanddate.com/worldclock/timezone/utc>

There are 24 time zones around the world. Each of us resides in one of these time zones. As you can see from the map below, UTC is based in London, UK. Our local time is a set number of hours before or after UTC.

In New York City it is UTC -5 hours
At 9AM in New York City it is 2PM UTC

In San Francisco it is UTC -8 hours
At 6AM in San Francisco it is 2PM UTC

In Romania it is UTC +2 hours
At 4PM in Romania it is 2PM UTC

In Perth, Australia it is UTC +8 hours
At 10PM in Perth, it is 2PM UTC
