

APPSolute Security

W100-IP Security System

New WiFi Home Security Alarm system uses free App and smart phone technology to protect your home with commercial grade security. No ongoing monitoring costs - FREE 24/7 remote monitoring and control by YOU with your smart phone ...

The only **NBN-ready** full Home Security Alarm system that gives you complete home protection for such a competitive price. Most other NBN-ready systems available use expensive GPRS technology or IP interface modules - which means you must purchase expensive hardware and your system can only be monitored by a back-to-base security control room - at an ongoing monitoring cost of between \$30 to \$50 per month!

The **W-100-IP Security System** is totally unique - it uses your existing home internet connection and a free app on your phone or pad so that you can monitor your home when you aren't there - 24/7 for FREE - no monthly ongoing monitoring costs at all! When any intrusion or movement is detected in your home, the alarm is activated - the siren sounds - and the system immediately notifies you wherever you are in the world through the W100 app on your phone. Arm, disarm, monitor - all remotely from your phone.

APPSolute Security

W100-IP Security System

You really don't need a home security system ...

Until you REALLY NEED a home security system!

Revolutionary new WiFi and Smart phone App technology brings high tech, commercial grade home security to homeowners ... at an unbeatable price. 24/7 total protection - FREE monitoring and control by YOU from anywhere in the world.

Arm and disarm the system from the home key pad, the wireless key-fobs, or the app on your phone - from wherever you are. Check on your phone when you are out whether the system is armed or not.

When any intrusion or movement is detected in your home, the alarm is activated - the siren sounds - and the system immediately notifies you wherever you are in the world through the app on your phone.

Activity log - records all alarm activations; which sensor or device in which room is activated; every time the system is armed and disarmed; and by whom - logs all activity.

Easy setup and programming of the system through the app on your phone. Set up for HOME and NIGHT modes, personalise the system for your home and family. Customisable settings.

Very loud 110dB screamer siren - sounds when the alarm is activated. Can be set for different lengths of time.

24/7 monitoring with the app on your phone. No contracts, no ongoing monthly expensive monitoring fees. Totally free self monitoring.

Fully expandable - easily add more wireless detectors and sensors as you need them - PIR movement sensors, window and door sensors, smoke detectors. **Ideal for renters** - easily remove and take the system with you when you move. All sensors powered by long life batteries.

Add High Definition security video cameras to your system. See what's happening at home when you are away. Record all activity, listen and speak to whoever is in your home. High Definition, night vision.

APPSolute Security

W100-IP Security System

The **W100-IP Home Security system** uses the **W100 app** - available free from the App store for iPhones/iPads, and Google Play for Android phones and Pads. The app can be used to control your system from anywhere - at home, when you are away, even overseas. All you need is a standard Apple iPhone/iPad or Android phone or pad - with standard data internet connection.

Below are several screen shots from the app ...

- 1 The main user page - where you can arm, disarm, arm in HOME mode - the alarm, as well as enter the SETTINGS and LOG pages.
- 2 The SETTINGS page, where you can personalise the alarm's settings for your own home and lifestyle.
- 3 The DEVICES page, where each device in your system is listed.
