

Amry Intelligence Community

Review of Walrus-like Behavior of
[/u/thanks_for_the_fish](#)

16 February 2017

Executive Summary

In January of 2017, it was brought to light by anonymous sources that u/thanks_for_the_fish (TFTF) may have been lying regarding his status as a human. External review of the evidence began the following month (FEB17), led by a team of investigators who specialize in shitposting and internet culture. The aim of this study was to evaluate the nature of who TFTF is, along with what possible motives he may have for infiltrating the reddit community of the United States Army (/r/army).

After discussing the matter with various intelligence agencies (FBI, CIA, NSA, NOAA), it was discovered that there were no other investigations involving TFTF. While the agencies above denied having any data on TFTF, they also failed to understand the importance of this study and requested the chair of the investigation team to promptly leave their facilities. Inside sources, such as an anonymous moderator who works directly with TFTF, have been vetted and their information is considered admissible. Evidence was also collected from publically available information, including the post and comment history of TFTF. The investigation team has discussed what these pieces of evidence suggest in a non-biased approach. It is of critical importance to elucidate the extent of TFTF's lies and how the infiltration of aquatic life could impact the /r/army community as a whole. The findings of this investigation team can be summarized below.

TFTF is, in fact, a member of the United States Army. The primary concern regarding the nature of TFTF was that he may have been an agent of a foreign nation. It has been proven, through post history and apparent knowledge of the United States Army that TFTF is in fact, a soldier. Limitations of this section are that it is impossible to tell whether or not TFTF is an agent of a foreign nation or opposing organization. At the moment, we are accepting his ability to enlist as positive evidence that he has been scrutinized carefully by the DoD.

TFTF is not a human, but is most likely a walrus. When confronted by members of the /r/army community, TFTF has failed to deny that he is a walrus or any other aquatic creature. We are aware that he works as a radiology specialist (68P) and thus excluded from field exercises that would quickly bring to light his soft, shitty walrus body. He uses this MOS as a means to hide his true nature, most likely out of an intention to deceive the community he moderates.

TFTF is secretly working to develop spices for a private and illegal fishing/fish seasoning business. It is public knowledge that TFTF has a degree in chemistry and has been trained by the United States Army to utilize equipment that could, through modification, aid one in developing spices to use on fish. Based on his geographic locations near bodies of water, along with the lack of publicity on his business, we conclude that he is involved in illegal fishing practices.

Finally, the /r/army moderation team has neither the resources nor ambition to properly conduct background checks on applicants who may or may not be sea creatures. The /r/army community is notoriously lacking in funding by the DoD. While funds may be unavailable, the inclusion of a member of another species, specifically a water dwelling species, is unacceptable and needs to be addressed immediately.

Scope and Methodology

The Amry Intelligence Community (AIC) has been investigating this case for approximately 3 weeks following the leaks hinting at the walrus tendencies of TFTF. The investigative team has met electronically during this time through moderator mail and through shitposting. Due to the nature of this case, it has not been openly discussed until this report.

Investigators drew the majority of their information from the post and comment history of TFTF and have established a thorough amount of evidence against him. Other information came from sources that work directly with TFTF in moderation of the /r/army subreddit. Although the data collection period was short compared to other congressionally commissioned intelligence reports, the investigative team used their EXCEPTIONAL abilities to digest the information in a rapid and accurate fashion.

In addition to the post and comment history and peer interviews, additional evidence has been found on the internet in the form of photographs and videos. These photographs and videos, which cannot physically be manipulated, provide invaluable information about TFTF.

Service in the United States Army

The investigative team, after thorough examination, has determined that TFTF is a United States Army soldier. Examples of his knowledge of the US Army can be found through continued answering of questions in the Weekly Questions Threads (WQT) and through his detailed report on training [1].

Although not the original intention of this review, the investigators have found evidence bringing TFTF allegiances into question. On the surface, it appears he is faithful to the army. Various posts meant to incite a branch war between the army and the navy have been made, with his preference for the army broadcasted publically [2, 3]. However, it has been a common ruse for agents of opposing organizations to feign support against their own. This, along with the walrus nature of TFTF (yet to be discussed), lead us to believe that he may be affiliated with the United States Navy. Further investigation has revealed family ties to the United States Navy [4].

The fact that a walrus, affiliated with the United States Navy, has become a moderator of an army community should be concerning to the community itself. A future investigation, most likely of a criminal nature, will require additional evidence into how TFTF naval affiliations have influenced the community. Preliminary research has shown that despite sharing his own family member's service, as seen in exhibit 4, he has been silencing others from doing the same in an effort to stifle esprit de corps [5].

Walrus-like Behavior and Conduct Unbecumming

As previously mentioned, the leaks indicting TFTF on the grounds of being a walrus have been accumulating at a rapid pace. The anonymous sources in the community have been hinting at this for weeks prior to this publication. This section will present each piece of evidence, along with a short explanation if deemed necessary.

- A. TFTF does not deny having tusks, regarding his ban from /r/amry [6]. He fails to pursue this matter farther, knowing that he cannot dispute the fact. This is confirmed in a private interview with a poster in /r/army (/u/MrPink10) who wishes for his username to remain anonymous.
- B. TFTF creates fascist policies on /r/army [7], while an image of him surfaces showing clearly a walrus in celebrating fascism [8].

- C. TFTF refuses to deny business deals and illegal oyster harvesting/consumption with an intellectually challenged carpenter [9]. Video footage of the meeting was recorded in secret and provided to the investigative team [10]. A follow-up by Matt Damon explains how this meeting was more than a crime, but an attempt to undermine the faith of this nation [11].
- D. TFTF seeks a promotion, leaving out details regarding his walrus nature [12].
- E. TFTF refuses to deny he has a profile due to his limited arm/flipper mobility [13].
- F. A picture of TFTF is provided by an anonymous source at the bottom of exhibit 13. The hyperlink to this image is found in exhibit 14.
- G. TFTF seeks a duty station near a body of water [15]. He also admits to swimming in the body of water discussed, which is something a walrus would do.
- H. A video of TFTF is provided, showing him attempting to break into POVs [16]. The context of these break-in is unknown but are considered sinister in nature by top security experts.
- I. In one of the most damning pieces of evidence, a thread blatantly exposing TFTF goes unanswered by the walrus moderator [17]. The accusations were started by, as seen in exhibit 17, by an exceptional member of the community who just received an award for his exceptionalness. Note: spellcheck did not correct “exceptionalness” so apparently that’s a word.
- J. TFTF has been implicated in creating alternate accounts where he embraces his walrus-ness and his proclivity for performing oral sex on men who are also performing oral sex on him [18].
- K. Not only is he a walrus, but he also might be collecting our youth in a “walrus lair” for various sexual favors [19]. It is paramount to finish this investigation as quickly as necessary to save those who may be in danger.
- L. TFTF has been performing conduct unbecomming of a soldier and a walrus. He is seen in a video performing oral sex on himself in front of families [20].
- M. In interviews with soldiers who wish to remain anonymous, /u/PrivateSnuffy said “He smells like shit” and /u/rolls_for_intiative said “when he speaks he says ‘arf arf arf’”. /u/blueliner28 anonymously stated “he has lots of hair between his nose and mouth”. Another anonymous source (/u/rustyfingers) stated “he has clammy moist gray skin”.
- N. A photo of TFTF in action has been provided [21].
- O. Another photo showing TFTF at work has been provided [22].
- P. All evidence provided above that is considered “true by lack of denial” can be justified as admissible through TFTF’s willingness to correct others in any context not related to him being a walrus [12]. Here, he corrects a user on regarding imaging techniques but not on accusations of walrus-hood.

The sheer volume of evidence here speaks to the truth of these accusations. The motives for TFTF’s lies regarding his walrus nature still need to be evaluated, but we fear they are diabolical in nature.

Illegal Fishing and Seasoning Business

It is known across reddit that TFTF has a degree in chemistry [23]. It is also well known that TFTF is a radiology specialist (68P) [24]. While on the surface this may seem innocent, the investigative team dove deeper, much like walruses, to uncover the truth. TFTF has been carrying out experiments in new flavors, such as cinnamon [25]. We believe this to be the possible start of his business ventures. Not only does exhibit 25 explain his experiments with spices, but it also shows that he has contacts with people who can provide him with chemicals. It is also apparent that he may be abusing his access to an MRI to test chemicals that he synthesizes. An astute chemist or physicist can temporarily convert an MRI into an NMR, allowing identification of compounds.

As mentioned before, TFTF desires to work near a body of water [15]. Water, as most of us know, contains fish that he seeks to exploit. In fact, it’s part of his username. It is highly likely that his

geographic positioning is for business gains and that there is a clear conflict of interest. Previous posts show he has been located in the Pacific Northwest region of the United States [26], which is a prime location for fishing. As mentioned in previous sections, TTF's character is duplicitous and lacking moral fiber. This suggests he will collect fish by any means possible.

Also worth noting in exhibit 26 is his desire to shoot photographs with a higher saturation and vibrance, and even seeks advice on how to do this. In underwater environments, colors are largely washed out. We believe he seeks better imaging techniques to better survey the underwater environment for potential fish and children to abuse. Luckily, his follow up post indicates that he has not mastered the technique yet, nor has he practiced the technique underwater to our knowledge [27].

Conclusion and Suggestions to Prevent Future Walrus Incursions

The above evidence strongly suggests that TTF has questionable allegiances, is not human but a walrus, and is starting an illegal fishing and seasoning business. Below, we have outlined suggestions for the /r/army moderators and community on how to best handle this situation going forward.

- A. Do not attempt to feed the walrus. Providing fish will only keep him around.
- B. Moderators, remove him from the moderation team at once to prevent further damage to the security of /r/army.
- C. All those with security concerns are welcome to a secure subreddit /r/army. We strongly suggest bringing #Whopperitos™.
- D. Allow pigeons full rights and protection under the law.
- E. git fuked
- F. u gon die
- G. No, seriously, remove him from the moderation team.

This report was published after the brave testimonies of anonymous sources, who wish for their usernames to remain hidden [Appendix B]. Without their brave sacrifices, we would never know the extent of this infiltration.
