

ADs Fix

This is going to be a short tutorial on how to install and use a **VPN** in your browser to fix ads not running!

This also covers ADs not working in your country if you select one of the countries the ADs are hosted in.

If you use a different browser tell me and I'd be glad to add that browser to the tutorial!

Counties with available ADs

United States

United Kingdom

Japan

Canada

Netherlands

France

Australia

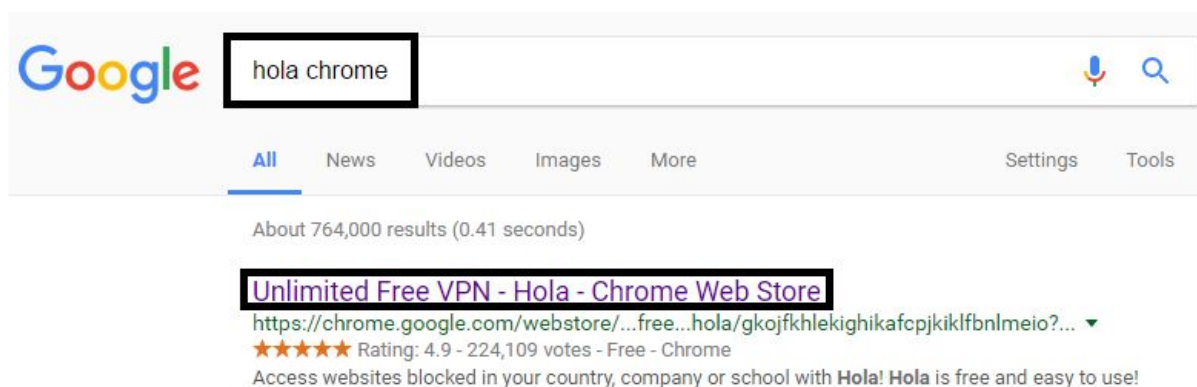

Germany

Russia

Google Chrome/ FireFox

This guide works for both Google Chrome & FireFox.

- 1) Enter "hola chrome" into the search bar. Select the 1st link that shows up labeled "Unlimited Free VPN - Hola - Chrome Web Store".

- 2) Near the top right of the window select "+ ADD TO CHROME".

The screenshot shows the Chrome Web Store page for the 'Unlimited Free VPN - Hola' extension. At the top, there is a puzzle-piece icon with a fire emoji, the title 'Unlimited Free VPN - Hola', and a 'G+' rating of 14k. A blue button labeled '+ ADD TO CHROME' is highlighted with a black box. Below the title, it says 'offered by hola.org' and shows a 5-star rating with 224,109 reviews. The category is 'Productivity' and it has 9,067,681 users. A green Android icon indicates it is available for Android, with a 'Get it >' link.

The main content area has tabs for 'OVERVIEW', 'REVIEWS', 'SUPPORT', and 'RELATED'. The 'OVERVIEW' tab is active. A large image shows the 'hola!' logo with a fire emoji and various website logos (YouTube, Facebook, PayPal, Gmail, Amazon, etc.) connected to a central fire emoji. To the right, there is a 'Compatible with your device' checkmark and text: 'Access websites blocked in your country, company or school with Hola! Hola is free and easy to use!'. Below this, it states: 'This is NOT a peer to peer application. This extension does not link to nor encourages the download of any other products and is fully functional as is without requiring any additional download/component.' Further down, it says 'FREE and secure VPN. Access websites blocked or censored in your country, company or school and stream media with the free Hola Unblocker VPN proxy service.' There are links for 'Website' and 'Report Abuse'. Under 'Additional Information', it lists: Version: 1.34.852, Updated: February 23, 2017, Size: 2.74MiB, and Languages: See all 47.

At the bottom, there is a section 'USERS OF THIS EXTENSION HAVE ALSO USED' with several other VPN extensions listed, including 'ZenMate VPN - Best Cyber Security &', 'Gom VPN - Bypass and unblock', 'Browsec VPN - Privacy and Security Online', and 'Hotspot Shield Free VPN Proxy - Unblock Sites'.

3) Approve the extension by clicking "Add extension".

4) Whenever you are in your browser you will see a small fire emoji in the top right corner, this is the VPN.

5) Go to the AD link that pops up in the chat. Once you are on the ADs page you can click the VPN icon in the top right corner of your browser. It will show up with a GUI, select America and the ADs should start to load.
