

Dear sir/madam,

Thank you for taking the time to read my CV in the following pages. I'm an Information Technology and Computing graduate from Arab Open University. I have knowledge in Java, web app development and designing, Firebase app development and Android app development. I have planned and developed an android app using Java, XML and Firebase as a graduation project.

I'm most skilled with front-end app development and Firebase. I like working in a team oriented environment and leading the team to success. I have experience with administrating a gaming community, my responsibilities include hosting gaming events, recruiting and interviewing applicants and resolving member conflicts.

I'm always ambitious about enhancing my skills and knowledge and providing my best to improve the environment I'm working in. I'm currently seeking a job/internship opportunity in an IT oriented company as a developer.

Looking forward to hearing from you soon.

Best regards,

Omar Saeed AlKherbawy.
