

# Caron Treatment Centers Founded in 1957

Pioneered Population-Specific Treatment for Young Adults in 2006

Project by Benjamin Steefel, BS, CADC, CCDP

More than 70% of young adult patients within the Caron continuum of treatment have an incomplete college education.

80% of young adult male patients reported that they'd enjoy a space to study and take classes more than an area to play ping pong.

Current Ping Pong Room at Caron's  
Young Adult Male Program

# Proposed Young Adult Male Program Study Center
