Rhinoplasty (Nose Surgery)

Rhinoplasty surgery or **nose surgery**, sometimes referred to as “nose reshaping” or a “nose job,” is a surgery designed to improve the shape of the nose for cosmetic purposes as well as sometimes for function. The surgery for reconstructing the nose after traumatic or surgical loss of a part or

whole of the nose is called Nasal Reconstruction and is traditionally thought of as distinct from Rhinoplasty. Cosmetic Rhinoplasty helps to bring the nose into harmony with the rest of the face by changing the width, the height, the tip as well as the nostrils of the nose. The **rhinoplasty surgery** can be used to augment the weak parts and reduce the bumps and disproportionate parts. The nose will look more proportionate to the face and more aesthetically pleasing. A **rhinoplasty surgery in India** is a good option for you if your facial growth is complete and you are 13 years of age or older.

Surgery of the nose may also correct impaired breathing caused by structural abnormalities in the nose. Ethnic Rhinoplasty maintains the ethnicity, while improving the balance and shape of

the nose. Guests from various countries all over the world visit our clinic just to get their **nose surgery in Delhi** by our esteemed plastic surgeon, Dr. Ajaya Kashyap. TESTIMONIAL

My expectations were more than met. I certainly would recommend Dr. Kashyap to anyone and would repeat this experience.

Clacy G. H., USA

Dr. Kashyap will be the only physician to do plastic procedures to me, past as well as future .

Linda P. , USA

Expectations exceeded, everything was organized, explained in full. So pre-operatively I was relaxed..

Lisa, UK
