

Eutaptics Hack on How to Make the Law of Attraction Work

Eutaptics understands that you can attract anything in the world into your life experience. It is a beautiful positive thing to know that. **However, does it work for you?** You may have joined the Law of Attraction belief system after it boomed into popularity from books, to tons of movies and clips. **But admit it or not, making things manifest is not that easy.**

Eutaptics Answers Why Your Desires Don't Manifest

The main reason why desires don't manifest even after turning your affirmations into an hourly mantra is because of the negative memories and thoughts you hold within the layers of your consciousness. In order for you to make manifestations easier you need to learn to change those records so affirmations will work.

Otherwise your desires will be left unheard by the universe because you are not vibrating the proper frequency to make things happen and align with your desires.

The very key to manifesting the desires is to convince all levels of your consciousness that **you deserve what it is that you desire**, if you do this, all the right events, people and things will be drawn unto you.

However, even if you do not consciously doubt but there are **traces of negative emotions and thoughts in your subconscious**, it will be very hard to make your desires manifest.

Getting Serious with The Law of Attraction
