Sub gloss white reflects less light comparing to high gloss white especially when the room is not bright enough or you place white table into dark area, you will have the illusion the shelf is in a purple tinge while this is actually how the

light get reflected from shelf to your eyes. We did use a real picture as the 4th picture, below is your picture and our picture side by side, both pictures are white.

How to fix back panel:

Use small nails to minimize the gap between back panel and shelf.

Table top need to be install inside of the bookcase as per description pictures,so table top is slightly shorter then bookcase.

How about we post some small nails with a mobile table worth \$40? Ebay no 311825700015 . Of course, no excuse retail price refund is available too if item is returned in original package, we provide refund or exchange (to timber color) service from 2148 kings park according to English description.
