

LUMINOUS
COLLECTION

feudivini
THE ITALIAN WINE PROFESSIONALS

Light up your night!

The need to emerge and toughen competition as far as possible with an original idea, more curious and interesting than what the market offers, has been the starting point for the development of our Luminous collection.

In the search for this novelty term, by looking at the various situations that gravitate around a bottle of wine, we have reflected on the problem of visibility within unlit environments. In similar circumstances, a bottle may disappear or appear similar to another simply because the label is not readable: the product is likely to lose its identity and be homologated to others, which is a major risk in terms of brand.

For this reason, the labels of the products contained in this catalog are luminescent labels, capable of making the bottle visible in situations of reduced brightness or full darkness.

Unlike similar solutions on the market, our idea is a great compromise in terms of expense and duration of the luminescent effect: what lies at the base of the luminescent effect doesn't exhaust, and therefore no expenses are needed to keep the product "valid" (aspect that would incur a higher cost for the customer).

The light effect is simply a reaction to exposure to any light source (whether it is an LED light, a wood light, or a normal light source inside a room) and therefore does not incur additional charges.

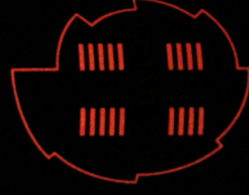

And if this still does not suit you, we're also available to "lighten" your labels, starting from a vector file you provide so you can further enhance your products ... at this point, what are you waiting for?

Light up your night! "

PROSECCO LUMINOUS

Luminous

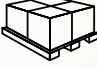

Description

Wine made from Glera grapes. Its pale straw yellow colour makes it fine and persistent. The smell is very fine and reminds of wisteria and acacia flowers. The taste is delicate, slightly sweet and particularly fruity. Thanks to its freshness, it is perfect as aperitif.

Characteristics

-  11,5%
-  Calamandrana
-  Glera.
-  Clay
-  End of September; manual harvesting.
-  Long, temperature-controlled maceration.
-  In steel.

Luminous

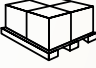

Description

This wine is produced from the best selection of our Corvina and Rondinella grapes. The fragrance is fruity with hints of raspberries and berries. The colour is a bright rosé. To the palate it is sparkling, round, sweet and pleasant.

Characteristics

-  11 %
-  Calamandrana
-  70% Corvina und 30% Rondinella
-  Sandy-clay top layer produced by alteration of the arenaceous marl layers below.
-  Early October - manual harvesting
-  This wine is obtained using a top loading system of the crushed and de-stemmed grapes, with bucket conveyor belts that maintain the integrity of the fruit and move the grapes along to the vinification in containers without using pumps. Fermentation is in stainless vats at controlled temperature.
-  In steel and small oak barrels.

LESTER'S GIN

Luminous

Description

We obtained the distinctive flavor of an original London Dry Gin by distilling the best berries of Juniper. The colour is clear and the perfume is typical of classic London Dry Gins, with an excellent intense aroma, fine and well amalgamated. You

can serve it "on the rocks" as an after dinner, with tonic water for the notorious "Gin & Tonic" or in mixology, in several international cocktails.
