

EMBED GUIDE FOR INFLUENCERS

GETTING STARTED GUIDE

This document will provide you with instructions on how to embed the Hashtagart Mosaic into any webpage or blog; there are two options to make this process seamless.

Step 1 - Embed the mosaic

Step 2 - Click ADD ME and enter your message into the mosaic

HOW TO EMBED - OPTION 1

Option 1 - Standard Embed

Add the following Hyperactivate embed code to your blog post. You may need to switch your blog editor to HTML to add the code.

```
<add code>
```

That's it. You're all done! Our platform can take it from here.

HOW TO EMBED - OPTION 2

Option 2 - Non-Javascript Embed

If the mosaic does not load on your page, you may have trouble loading javascript. Option 2 is a less restrictive embed that does not require javascript.

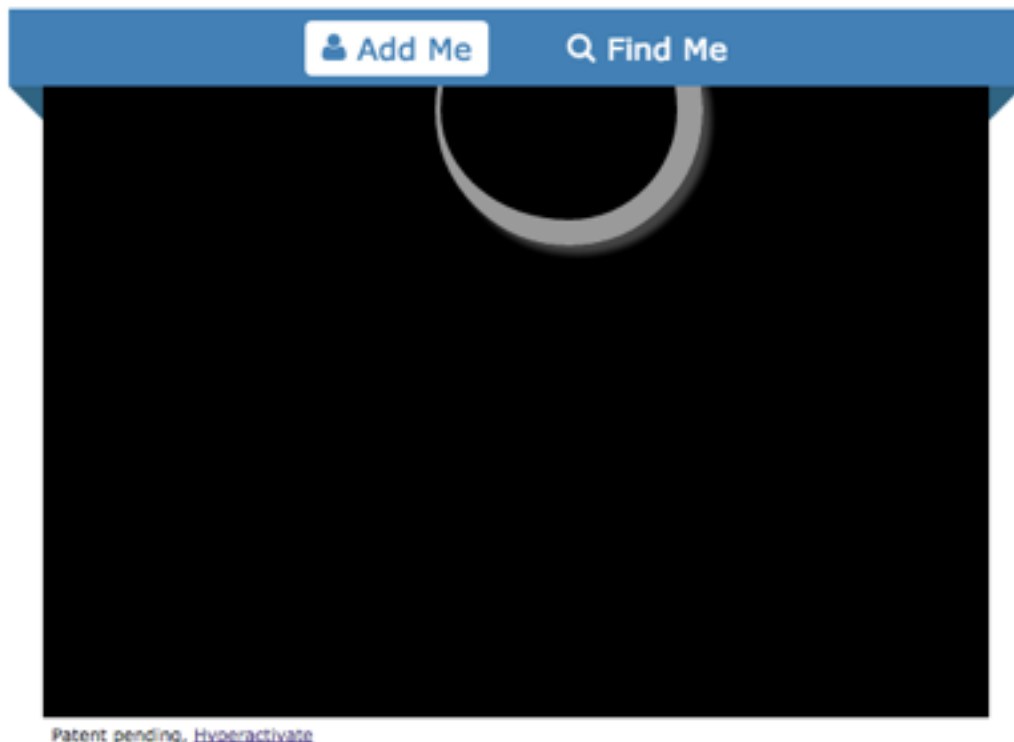

Locate the place in your HTML code where your mosaic should appear, and add this code.

```
<add code>
```

WHAT HAPPENS NEXT

If you used Option 1, you should see the mosaic display in your post. It will look like this ...

Have you studied abroad? Know someone who has? Why should students study abroad? Chime in and let your voice be heard. Click the **ADD ME** button to add yourself to the #StudyAbroadBecause mosaic.

Patent pending, [Hyperactivate](#)

As the mosaic fills in, the tweets and facebook posts make a picture like jigsaw puzzle pieces. Everyone needs to work together to reveal the final artwork.

If you used Option 2, you should see this in your post ...

ADD YOURSELF

- Click ADD ME to add yourself to the mosaic.

TROUBLESHOOT- ING

- Sometimes in wordpress, the preview button breaks javascript code. If you are using wordpress you may try to post your message without clicking preview first.
- If the first embed option doesn't work, use the second embed option.
- If you have any trouble integrating the mosaic and embed code, let us know and we can assist you. Email idan@hyperactivate.com
