

# Does Electronic Medical Record Work For Single Doctor Practices?

The number of small practices and solo practitioners adopting Electronic Medical Records (EMRs) has been found to increase steadily. Primary driving force behind higher adoption of EMRs among solo practices is the numerous solutions offered by EMR that fits practice requirements, size, and their budget!

## Study proves beyond doubt that EMR adoption grows among individual providers

Survey reveals that while there has been an increase in EMR adoption among physicians managing individual clinics, there is a correlation between EMR adoption and patient inflow. Physicians begin to realize their limited window of opportunity for taking advantage of federal reimbursements via digital record management technology. Solo practitioners' EMR adoption is expected to jump substantially, in the near future.

## Factors Driving Increased Adoption of EMR Software by Solo Practices

There are several motivational factors that cause a growing number of single doctor practices to use EMR Software; a few have been listed below:

- ✓ Federal rules have incentivized EMR system implementation
- ✓ Ease and convenience of access to patient health records

- ✓ Web-based EMR Software offers cost-effectiveness and efficient work flow
- ✓ Reduction in man power and infrastructure needs in the practice
- ✓ Round the clock, unlimited support and guidance offered by the vendors
- ✓ Multi-device compatibility and automated processes

### **EMR Software bodes well for Solo Practitioners**

With greater autonomy offered by being the sole proprietor of the practice, health care providers in solo practice environment may make quick decision about migration to [Electronic medical records software](#) System. Increased availability of effective cloud-based platforms is one of the favorable factors that encourages EMR adoption. By reducing the amount of upfront costs, cloud-based systems relieve practices from shouldering the burden of a dedicated server. This model also eliminates the need for having dedicated IT staff in the practice.

### **EMR Software Helps Solo and Small Practices to Improve Efficiency**

Several small and individual practitioner health facilities have realized the benefits of early implementation of [EMR Software](#) System. With vendors constantly trying to update and improve these systems, benefits to solo physicians keep increasing too. Following are a few of the benefits of EMR adoption to solo practices:

- ✓ Errors are reduced in charting
- ✓ Work flow efficiency increases in the back office
- ✓ Errors in prescriptions are eliminated with E-prescriptions
- ✓ Faster collection on billing
- ✓ Easy learning possibility due to pre-customized templates

### **How does EMR Software improve overall Efficiency of Single Doctor Practice?**

- ✓ ***E-Prescription Service***
  - Reduction in duplication
  - Saves paper work
  - Drug interaction checks
  - Quick submission of orders electronically

✓ ***Automation of processes***

- Automatic appointment reminders
- Appointment scheduling
- Online patient portal

✓ ***E-Billing Feature***

- Automatic insurance eligibility checks
- Perfect Medical coding and billing
- Billing solutions offered by providers may be integrated directly into EMR

Single user EMR Software is likely to be made mandatory for solo practices. EMR Software exclusively designed for single doctor practices will help in easy record maintenance, clearer billing, simplified coding, and prescription processes.
