# The Seven Hermetic Principles

---

- I. The Principle of Mentalism - The All is Mind.
- II. The Principle of Correspondence - As above, so below, as below, so above.
- III. The Principle of Vibration - Nothing rests; everything moves, everything vibrates.
- IV. The Principle of Polarity - everything is dual; everything has poles; everything has its pair of opposites; like and unlike are the same; opposites are identical in nature, but different in degree; extremes meet; all truths are but half-truths; all paradoxes may be reconciled.
- V. The Principle of Rhythm - Everything flows, out and in; everything has its tides; all things rise and fall; the pendulum-swing manifests in everything; the measure of the swing to the right is the measure of the swing to the left; rhythm compensates.
- VI. The Principle of Cause and Effect - Every Cause has its Effect; every Effect has its Cause; everything happens according to Law; Chance is but a name for Law not recognized; there are many planes of causation, but nothing escapes the Law.
- VII. The Principle of Gender - Gender is in everything; everything has its Masculine and Feminine Principles; Gender manifest on all planes.

## Afterword

The purpose of this book is to introduce a few to some basic esoteric thought, voice some of my own personal beliefs, and possibly rally some like minded to help build a world, or at least carve out a place in this one, that we would be happy to call our own. Koralea doesn't exist yet. it is only in my mind, but the shape of Kentucky calls for that name. My dream is to make enough money in my life time to buy it, though I've not spent much time there, and set up a town in the forest somewhere. If you're reading this and entertain similar thoughts please feel free to contact me via Facebook. Type in Droneksaize and you should find me. I am African-American and ethnicity is a non-factor in joining the Koral people, of which I am at present the sole. Not everything has been worked out yet and suggestions are welcome. I am 28 currently and this may be an immature aspiration, but this is my brain-child and I've been thinking about it since I was 19. I would like it to see light and be born in reality. Nature and Technology, Science and Magic.

Koral is a term I derived from the anime Eureka 7 when I misremembered and misappropriated the name of a storm cloud to the form of being that Eureka and Anemone were. They are formed of Plant and Coral and Animal by Earth in order to be its eyes on humanity to judge if they are worthy of inhabiting it again. I am imaginative, and possibly insane in believing I am the same thing, minus the born directly of Earth thing, and plus a Metal and Mushroom. I am a Copper, Blue Coral(which may only exist within me), San Pedro Cactus, and Wolf Humanoid born of two human parents. I am also possibly insane in believing I have a wife I've never met. I pray I'm not, insane that is...

Anyway, this book was suppose to have a list of animals and their symbolisms, but I got tired of typing and there were a lot to cover. My apologies. I give you this book in faith. I do not take money for it.
