
Extractor Information Form

Process Specs

What is the make/ model of the machine used for extracting from raw material?

Do you supply your own trim or other raw material? If not, do you know where and how the Cannabis was produced? (i.e. pesticides used, growing conditions?)

What general process do you use to produce your concentrates?
(if solvent-based, please list solvent(s) used)

Is there heat used in your process? If so, what temperature and duration?

(Are you decarboxylating your concentrates at some point in your process? Do you seek to maintain a certain level of acidic Cannabinoids? Do you seek a fully decarboxylated product?)

Does your process involve alcohol-based filtering, or “winterization”?

Final Product Specs:

In terms of percent THC or CBD, what is your goal concentration for your finished product(s)?

Approximately how many batches are you producing in a week or month? How large is a batch?

Are you adding terpenes to the final product? What type are they?
