

## OPERATION CLEAN HOUSE

**Date:** January 15, 2019

**Context:** Altisian rebel groups have, for the most part, allied or merged to form the Free People's Republic. They rapidly coordinated to assault and overtake the government garrison in the town of Charkia. Having elected a 'president' to preside over combat operations in the town, they have become extremely centralized and coordinated. They also see this as the do-or-die effort to throw off Greek government control of the island.

The Australian forces on Altis have been mobilized, in coordination with local government forces, to take Charkia back. Civilians have long since abandoned the town and it has been declared a **Free Fire Zone** by the Greek Army. Altisian rebels have stolen building and entrenching equipment from across the island and have been working relentlessly to build in-depth defenses.

### **Objectives:**

Form up in the staging grounds. Radios, gear, vehicles etc.

Advance to **Phase Line Zulu** - Await code word **Irene**.

Assault into **Phase Line Hadrian** - Fire support is available.

Continue assault into **Phase Line Austerlitz**.

Assault **Phase Line Hannibal**. Advance onto **Point 1** through **6**.

Secure **Phase Line Reich**. Await further instructions.

### **Rules of Engagement:**

You *must* adhere to the RoE at all times.

1. Charkia, outlined in red, has been declared a **Free Fire Zone**. Engage hostile uniforms at will.
2. Attempt to negotiate surrenders of enemy soldiers if safe to do so.
3. Do not fire on civilians.
4. Unarmed but uniformed enemies are considered hostile until a signal of surrender is made.

**Notes:** The ADF task force has been lent the use of a US Army M3A2 Bradley IFV and an M113 APC. These two vehicles are fire support and armoured transport respectively. While extremely powerful and protected, both vehicles are extremely vulnerable to dedicated anti-armour weaponry and **MUST** be protected closely by the infantry.

Infantry should use the vehicles as mobile cover and fire support against enemy hard points. **ONLY** the M3A2 Bradley will be manned during the **ENTIRE** mission. The M113 is merely transport.

### **Fire Support:**

4 Gun Battery of 155mm howitzers

2 ship flight of A-10C Thunderbolt IIs

### **Callsigns:**

Eureka B1 - Infantry Fireteams

Oscar A1 - M2A3 Bradley IFV

Sunray - Command & Control

- CBA\_A3
- RHSAFRF
- RHSUSAF
- ace
- RHSGREF
- task\_force\_radio
