## STEAM TURBINES

100KW capacity to 30MW

**intelligent** *energy solutions*

5 Continents, 10 Countries and more than 100 satisfied clients.

**World's Best**  
Back pressure Steam Turbine  
upto 5 MW.

Some of the unique features that make MS-52 the best turbine for back pressure application. (Frame size suitable up to 6 MW)

Best efficiency of any contemporary back pressure steam turbine.

Excellent part load efficiencies.

virtually maintenance free, with minimal maintenance costs.

Excellent safety record with 100% uptime.

Capable of withstanding shock loads.

Immune to steam pressure fluctuations to a very large extent.

Slow operating speeds.

Quick acting Stop and Emergency valve.

Significantly reduced hot and cold start times.

Very large number of repeat customers and a huge installations base in India and around the globe.

Highly responsive Electronic governing

Flexible configuration, being easily upgradable for future expansion needs, suitable for high back pressure.
