?>

```

2. Here's a guide that explains how to center the main header menu in WordPress using Center Menu CSS .
Add the styles directly in your Child Theme style.css or Appearance > Theme Options > Custom CSS.

```
@media screen and (min-width: 981px) {  
  .menu {  
    text-align:center  
  }  
  .menu li {  
    display:inline-block;  
    float:none;  
    margin-left: -5px;  
  }  
  .menu li li {  
    display:block;  
    text-align:left  
  }  
}
```

WordPress is an online, open source website creation tool written in PHP. But in non-geek speak, it's probably the easiest and most powerful blogging and website content management system (or CMS) in existence today.

WordPress plugins are bits of software that can be uploaded to to extend and expand the functionality of your WordPress site.
