## **The Design that Stands Out**

The stylistics of the game process completely coincides with its theme.

- When you start the slot in front of the player appear on the red background of five of the drums with a bizarre ornament.
- On top of the emblem of the manufacturer flaunts, and in the lower left corner - the logo of the game itself.
- The game does not abound with animation and sound effects, only the sounds of clicks generated at the start of rotations are audible.
- The betting panel is traditionally located at the bottom, while it appears to be a part of the background image, standing out against its background only with the appropriate signatures.

## **How to Play**

This game is characterized by a wide selection of game characters, a colorful interface and an unusual configuration of the slot itself, which allows you to use simultaneously from 1 line, putting at the same time 0.01 credits, up to a hundred at the maximum possible rate of 1500. In the long term, the slot yield is almost 95% which is largely promoted by wild and scattered symbols, which often improve ready-made

combinations or replace unnecessary characters with necessary ones. For the game, you need to turn to the functional panel located at the bottom under the five of the playing drums.

- According to the rules of the game for winning wins, it is necessary to collect from three to five symbols on the active line, and they should be the same and be located on the neighboring drums.
- The exception is made by the scanners, which allow to compose combinations based only on the number of symbol repetitions, and not on their placement.
- The scatter symbols are also responsible for triggering free spins, in which wild symbols fall out particularly often on 2nd, 3rd and 4th reels.

If there are several combinations at once on one line, the amount of credits for the highest of them is paid. If several combinations were formed on different lines, a prize is awarded, equal to the sum of all individual wins.

To adjust the game parameters, you need the following buttons: Lines for line setting, bet for determining the bet amount and Spin for starting the spins in manual mode. Above this button, you can see the inscription auto, which activates the automatic game when you click on a nearby plus.

## Summary

Slots of the Dragon line will appeal to a wide range of users, including both beginners and already experienced online players. Among the variety of gambling, the devices that reveal the culture and traditions of the peoples are very popular. The concept of [a slot machine](#) can be easily learned in minutes even by novice users, in large part because of the small number of buttons on the functional panel that could be confusing.
