Owner

CSS-Trainer

Worked as part of a multi-disciplinary team, as an industrial compressed air service technician to perform preventative maintenance and 24/7 emergency service. I have gained several valuable trade skills as well as having acquired several certifications and permits thru DELTA INDUSTRIES.

I was responsible for the restoration of electronic devices that have been salvaged threw diasters (fires,floods,etc...) We were responsible for the restoration of the server's and equipment at the FAA Facility in Aurora during the fire of september 2014.

Rebuilt and refurbished recycled electronics and systems, diagnostic and troubleshooting experience was acquired throughout my time at Vintage Tech. I was brought in as lead on the Netflix account where I was responsible for inventory and pre-distribution.

-Currently in progress-

- GENERAL STUDIES -

James owns and operates an asphalt paving company that's been around since 1992, and is well known throughout the Chicago area.

Sunny has been with apple since 2014 and is a customer support trainer for Apple, Inc.
