

Melbourne Timber Flooring Options

Whether you are building a new home or renovating an existing house, flat or office, adding a timber flooring is a great way to improve the aesthetics and add value to your property. Oak flooring and engineered timber flooring are valuable assets to a building as they are durable and long lasting.

Timber flooring Melbourne

Timber flooring is exactly what the name suggests - a floor made solely out of wood. If you are looking for **Oak Flooring Melbourne** or Timber Flooring in Melbourne, Terra Mater offers a wide range at affordable prices. The advantages being

Easy to clean: Contrary to other materials like carpets, timber floors do not collect dust particles and allergens. This is especially beneficial for those who suffer from chronic allergies.

Easy to maintain: even though the occasional scratch or gouge may appear, it can be easily repaired using timber floor polishing. This will restore your floors to its original finish. Hardwood floors can be refurbished multiple times. Thanks to the veneer finish of engineered flooring, repairs are possible albeit not as many times as with hardwood floors.

Variety: One of the most important features linked to timber flooring is the aesthetic appeal they add to your home, Timber floors add a feeling of elegance and value to your home. Timber flooring comes in different shades and colours allowing the homeowner to choose their style.

You can choose the following options for Timber Flooring

Hardwood Flooring. Hardwood is the most popular type of timber flooring. This type of flooring is made from a certain types of slow growing trees. Hardwood floors are fine, beautiful, heavy and harder than other types of wood.

Engineered Timber Flooring Melbourne: Engineered timber flooring differs from hardwood floors as they are manufactured by strips of different kinds of wood glued and pressed together with a veneer. Engineered timber floors are more affordable and the veneer finish makes them look just like real hardwood floors. It can be installed over all types of subfloors.

Reclaimed Timber Flooring: Reclaimed Timber Flooring consists of floorboards from used lumber.

Bamboo Timber Flooring: Bamboo flooring has the added advantage of being an environmentally friendly alternative while upholding its aesthetic appeal as timber flooring.
