

To the Residents of the United States of America.

Witness how many Republicans fight harder and dirtier because their fight is for power and their party over OUR country, the United States of America. Their behavior is laser-focused, like protecting some exclusive, superior sect consisting only of themselves.

The problem with disciplining politicians who violate our laws is that the law must be followed in order to do so.

These politicians know this, and they protect each other through further abuses of their powers. This makes their crimes even more dangerous. Their reach, their violations, grow bolder. **They have cost people here their lives and their health. You may know some of them.** They waste OUR money and make enemies of terrific people around the world because of their differences, not ours.

We the people of the United States of America need to #RESIST the belief that POLITICIANS BREAKING THE LAW is normal, acceptable and an insurmountable challenge.

YOU, WE, ALL OF US must work within the law to destroy this practice and make accountability, arrests and convictions of guilty politicians possible.

America isn't indestructible. We see its beauty, inclusiveness and freedoms crumble every day from these politicians, the enemies within. Those politicians who swore to protect the United States but thought WE were too stupid, naive, apathetic or disorganized to fight back.

For those guilty of crimes while in office, WE need to prove them wrong, get them out of office and prosecute them.

This is **not** the next generation's job to do.
This is OUR job to do. Today. NOW.

**We proved we can #Resist.
Now we must affect positive change and accountability
FOR the next generation. This will not stop unless we do.**
