

Lighting as a Service

A **better way** to power your organization.

Apply Online

Introducing: Lighting as a Service

New lighting can make your store more efficient, more productive, and more beautiful.

Until now, upgrading your lights also meant spending your time, upfront capital investment, and a whole lot of complication.

Lighting as a Service solves this problem, giving you the benefits of new lighting technology without the hassle.

Access the latest lighting technology - without buying it.

With Lighting as a Service, LED Supply Co provides your True Value store with efficient, high-performance LEDs without you having to divert your core resources to procure them.

Our experts will design a lighting system to fit your specific needs. Then, for a fixed monthly payment, we guarantee that it works exactly as it should.

Old Way

COMPLEX PURCHASING PROCESS

Accessing the latest lighting technology required you to dedicate your precious resources to research and procurement, shifting their time and focus away from the core mission of your organization.

IF IT BREAKS, YOU FIX IT

Whether you lease, borrow, or purchase outright, you own and are responsible for every piece of equipment. If something breaks, you have to fix or replace it.

COMPLICATED CONTRACTS

Purchasing efficient lighting systems at scale meant working directly with financing, suppliers and subcontractors each of which come with contractual complexity.

New Way

ONE MONTHLY COST

A single OpEx payment covers your installation, repairs, monitoring, and ongoing service with no upfront cost.

NO-RISK GUARANTEE

We ensure that your technology works through the entire contract term. If it doesn't work, you don't pay.

SIMPLE CONTRACT

We provide a short, easy-to-execute Technology Subscription contract with a simple list of the new technology and how it works.

A better way to procure.

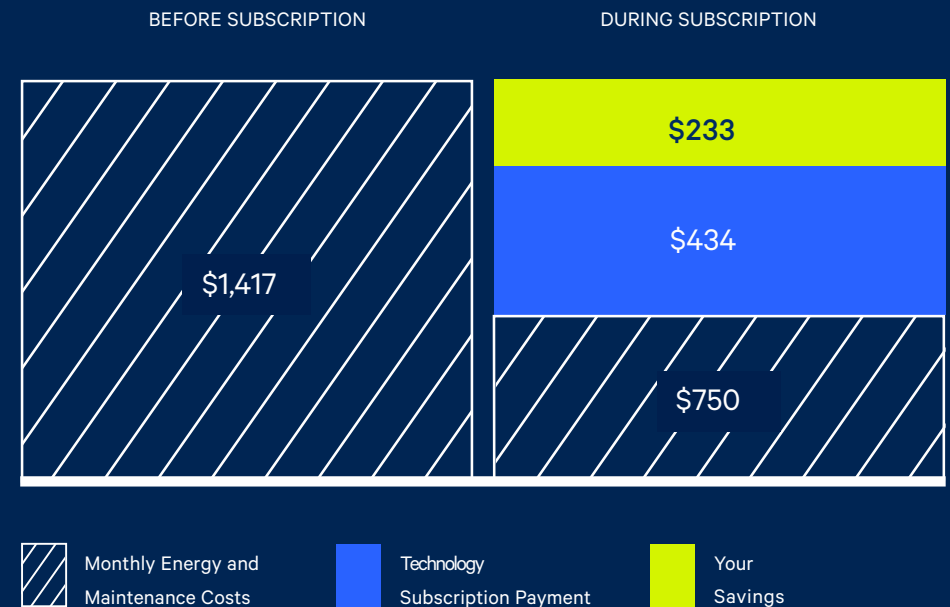

Traditional ways to buy new lights just don't compare. **Lighting as a Service**, powered by a simple technology subscription contract, brings you the lighting system your store needs while allowing you to focus on what matters.

	Subscription	Loan / Lease	Cash Purchase
Reduces Energy Costs	✓	✓	✓
No Upfront Capital Investment	✓	✓	
Operating Expense*	✓		
Includes All Maintenance & Support	✓
