

## Key Features - CareStack 2.1

In CareStack version 2.1, we've added a Calendar icon for quick access, improved the claims module, and improved access to information in other modules.

### Navigation

- Jump quickly to the Scheduling Calendar without using any menus with the new Calendar icon on the navigation bar.

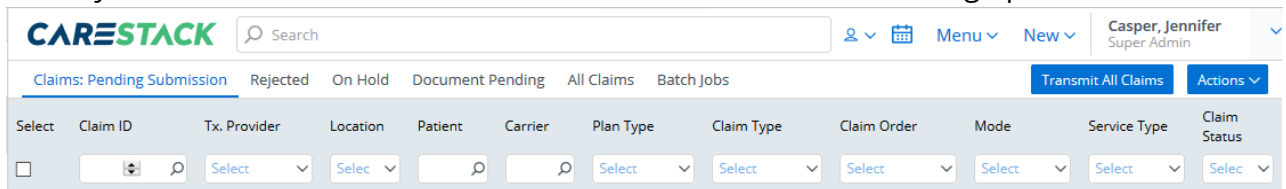

### Scheduling

- Move through the slot search results with new Previous and Next links which can even take you beyond your original search to meet the patients' needs.
- Work with patients to reschedule from the reschedule queue without switching to the patient profile since the phone numbers are now visible in the queue.
- Check out patients quickly -the patient's appointment page opens automatically when an appointment is checked out.

### Claims and Payment Management

- Identify and sort claims with default filters and column based searching options.

- Review paper and electronic claim details within the grid and use the automated status to determine document requirements, or break claims into location or provider based batches.

### Additional Improvements

- Void prescriptions.
- Upload up to 10 documents to a profile at once with an easy drag and drop tool.
