

Enhance Love Making

butterflysettee.com | (386) 232-5769

When it is time for imitate activity the Butterfly Settee becomes practically limitless. The Settee's namesake is actually a position love making position that you can achieve effortlessly using the Settee. In the butterfly position the woman is on her back and her hips on the edge of the bed (or our case a settee that can support you at any angle), the man penetrates her while standing. She then puts her legs over his shoulders and tilts her hips slightly upwards. This gives a wonderful angle for cervical stimulation with deep penetration that can produce some intense vaginal and uterine orgasms. With more shallow penetration, a man can stimulate the anterior vaginal wall to hit the G-spot. This of course is a variation of "ankles up" and several other male standing type positions.

The Butterfly Settee allows you total control to experiment with any angle and height that gives you and your partner maximum enjoyment. Rear entry or "doggie style" positions take on new heights because the Butterfly Settee can support your partner in any position allowing you and your partner to focus all your energy on mutual enjoyment.

The multi-function settee also creates some mind blowing positioning for the ultimate oral sex experience for him and her. The following diagrams are for inspiration. We recommend you experiment routinely to find the right angle for you!
