Gill Sensors & Controls are a UK based designer and manufacturer of precision sensors and gas engine controls.

Gill Sensors and Controls

Our products are used worldwide

Gill Sensors & Controls are a UK based designer and manufacturer of precision sensors and gas engine controls. Our products are used worldwide in a broad range of industries including motorsport, automotive, heavy plant, marine, manufacturing and energy.

Gill design has become synonymous with innovation, performance and longevity, in both our standard product range and customised solutions.

FIND THE BEST CONDITION SENSORS

OIL CONDITION MONITORING - A DIFFERENT KIND OF INSURANCE

Condition-based or predictive maintenance is a strategy that improves availability and reliability whilst reducing costs. Monitoring for early indicators of potential component failure allows for planned investigation and repairs to be carried out before equipment failure occurs.

Continuous real-time monitoring via sensors is a vital element to this strategy, and the condition monitoring sensor range by Gill provides an innovative insight into the health of gearbox and transmission systems.

Combining four of the most common modes of machinery failure-ferrous wear and failure particles, water in oil contamination and oil presence indication - in one compact unit, provides a valuable tool in helping you maximise machinery availability and minimising expensive downtime.

4212 OIL CONDITION SENSOR

- Captures fine wear & coarse failure ferrous particles
- Water in oil contamination detection
- Oil temperature or oil presence measurement
- Reduce unplanned downtime
- In-line electronics

4212 OIL CONDITION SENSOR WITH DISPLAY

- Captures fine wear & coarse failure ferrous particles
- Water in oil contamination detection
- Oil temperature or oil presence measurement
- Reduce unplanned downtime

THE GILL COMPANY

Gill is comprised of forward-thinking employees, who are experts within their field. From Engineers to Accounts and Production, we strive to provide our customers with trusted products which meet requirements.

Based in modern offices in Lymington, Hampshire, our team work on a wide range of sectors, each with their own set of challenges, offering a diverse working environment and opportunities. We take pride in the people who make up our team and conduct ourselves in a way that demonstrates uncompromising ethical standards with customers, suppliers, distributors and our staff.

DISTRIBUTORS

Gill Sensors & Controls Ltd have strong relationships with our worldwide partners, who are able to provide technical and commercial support for our products. Our distributors can be contacted directly, using the contact details outlined below.

Use the drop down boxes to find the details of the distributor serving your region and/or product group.

WHO ARE WE?

Gill Sensors & Controls Limited is a leading UK based manufacturer of innovative sensors used in Construction, Agriculture, Motorsport, Defence, Marine and Material Handling industries. Certified to ISO 9001:2008, Gill provides both standard and custom electronic products to some of the most recognised brands in the world.
