

Dental implants have a very high rate of success

If you plan to have dental implants placed, or have recently been recommended for implants, then you probably already know the wealth of benefits that they will provide. After all, having a full and healthy set of teeth is an integral factor to your dental health. Before your implants can be fully utilized, however, they require a successful recovery after surgery. www.implantsolutionsnow.net

While dental implants have a very high rate of success with few risks, nearly all patients can expect at least a few side effects during the early stages of recovery. In order for patients to have appropriate expectations for the post-surgical healing process and prepare accordingly, take the following notes into consideration. With the right information and the skilled hands of Dr. David Turbyfill, a board certified oral surgeon, you can have a successful and rewarding dental implant procedure. www.implantsolutionsnow.net

Early Side Effects of Surgery

Right after implant surgery is complete, you will likely feel the residual effects of the procedure's anesthesia and sedation. Although some patients may feel nauseous or light-headed afterward, most people are simply calm and drowsy. With the help of a friend or family member, you can arrive home to begin your rest. www.implantsolutionsnow.net

It is important at this time to begin taking your prescribed painkilling medication, in order to limit discomfort as the anesthesia begins to wear off. Although some patients may be tempted to take a weaker analgesic or no medication at all, prescription-strength painkillers are recommended for at least the first few days, and it is much easier to prevent pain from setting in than to counter it afterward. www.implantsolutionsnow.net

In the hours following surgery, patients may notice light bleeding from the implants and their incisions. The application of a gauze pad and light pressure should manage any temporary bleeding, which should resolve completely by the end of the day.

Proudly serving Sanford residents & all of Central Florida.
