

Manage your cloud Not the other way around

CLOUDHEALTH TECHNOLOGIES MAKES CLOUD MANAGEMENT SIMPLE.

Managing cloud infrastructures can be substantially more complex than traditional data infrastructures; however, cloud infrastructures have the potential to become highly optimized, intelligent systems that improve enterprises.

With the opportunity to automate tasks and processes, the relationship between scale and complexity is rapidly diminished. CloudHealth is a policy-driven solution. You get full visibility into your entire cloud infrastructure, allowing you to identify opportunities for cost, usage, performance, security, and availability optimizations and then automations to simplify. In other words, you manage your cloud to manage itself.

“When we entered the digital world, we didn’t have a good view into our cloud spend. All finance saw at the end of the day was a bill, and the bill was rising every month... CloudHealth tells us which environments can be shut off outside of business hours, saving us more per month.”

- Russell Bradford, Cloud Platform Manager, News UK

CLOUD MANAGEMENT IS NOT ONE-SIZE-FITS-ALL. CLOUDHEALTH IS.

Every IT infrastructure is different. There is no end to the complexities and demands of varying applications and assets, but complexity can be simplified. CloudHealth monitors your accounts, applications, assets, and services and calls your attention to opportunities for automation.

SEE WHAT YOU GET WITH CLOUDHEALTH:

VISIBILITY

In large cloud environments, even in the best case scenario, it’s common for the right hand to lose track of what the left hand is doing. CloudHealth brings global consolidated visibility and on-demand reporting across your entire cloud environment so you can identify and manage issues before they become problems.

OPTIMIZATION

Many organizations turn to cloud-based infrastructure to achieve efficiency and cost savings. But you won’t accomplish these goals without cloud optimization—constant tuning, managing and automation of your assets. With CloudHealth, driving efficiency no longer requires labor intensive manual alterations— Instead, you can automate workflows, programmatically tune your infrastructure and see your entire environment in one pane of glass. The result is a cost and performance optimized architecture that scales without added complexity.

GOVERNANCE

You can’t control billions of data points — but CloudHealth can. With multiple users across many departments deploying new services, applications, and assets, the rate of change is beyond the scale of human management. This makes manual evaluation, analysis, optimization, and reporting difficult, if not impossible. CloudHealth automates and controls assets based on enforcing business policies and governance definitions set by you.

AS YOUR CLOUD SYSTEM GROWS, SIMPLIFY IT.

1

CONSOLIDATE
Consolidate cloud infrastructure & data

2

EVALUATE
Create dynamic business perspectives

3

ANALYZE
Analyze usage, cost & performance by business perspectives

4

OPTIMIZE
Recommend & execute for optimization

5

AUTOMATE
Automate & define business policies

WHAT CAN CLOUDHEALTH DO FOR YOU?

CUT COSTS

- Save 10-20% on cloud expenses starting day one
- Keep your cloud continuously optimized

GO FASTER

- CloudHealth customers reclaim hundreds of hours per year
- Manage and understand cloud performance

REDUCE RISK

- Governance simplified – create rules to manage infrastructure
- Stay ahead of vulnerabilities before they cause problems

MANAGE COMPLEXITY

- Rightsize millions of instances with one click
- Tame shadow IT with visibility across all users

READY FOR A CLOUD HEALTH CHECK?

CloudHealth is designed to give you the power you need to build the most efficient system possible. Policy-driven optimization is unquestionably the fastest way to maximize usage, costs and performance.

If you'd like to learn more about CloudHealth and how we can work for you, all it takes is 20 minutes. Let us walk you through our solution rich platform and show you how we can help you scale your cloud without scaling your IT workforce. Visit us online at cloudhealthtech.com or call 617.986.3900 to schedule your demo.

“CloudHealth is a superior cloud management solution—from both a product and support perspective. Nothing in the market comes close to CloudHealth.”

– Ron Fuller, Director Web Services, Mentor Graphics

ABOUT CLOUDHEALTH TECHNOLOGIES

CloudHealth is changing the way organizations manage cloud environments through a policy-driven approach and focus on cloud governance. The company's cloud services management platform consolidates, evaluates, analyzes, and optimizes data from disparate data sources. This results in an optimally performing cloud environment, enabling enterprises and service providers to align cloud operations with business objectives, while reducing costs and ensuring service levels are being met. The company is backed by Scale Venture Partners, 406 Ventures, and Sigma Prime Ventures, and is headquartered in Boston, MA.
