TRICHOMES - THE KEY TO A GOOD HARVEST

The moment of harvest.

Knowing when to harvest your crop is one of the most important times during growing. Harvesting your crop too early or too late can make all the difference in the quality. Thankfully nature has given us very clear indicators in the form of capitate stalked trichomes. Using a microscope or magnifying glass it is possible to watch for the colour change in these glands and help with getting the perfect moment to harvest your crop.

For more information visit our website www.amsterdamgenetics.com

CANNABIOLOGY

Tetrahydrocannabinol or THC is one of the active ingredients found in Cannabis. Cannabinoid receptors are located throughout the human body and these are known as the endocannabinoid system. When cannabis is inhaled or ingested it binds to these receptors.

Calyx

This is the actual flower part of the plant which grows on the end of a stem. Only female plants will produce a mature bud or calyx.

Pistils

Tiny red or orange coloured hairs whose only purpose is to catch the pollen from male plants. These hairs contain no THC or CBD.

Trichomes

These tiny mushroom shaped glands are filled with resin and cover the surface of the calyxes, leaves and stems. It is these glands that are used in Hashish making.

Sugar Leaves

Tiny leaves which grow around the calyx to protect the bud. Although these leaves are high in THC they are generally removed and used in edibles or turned into Hashish.

Stalk

To growers and smokers the stalk is of no value. However the extremely strong fibres are great for making fabric, paper, rope and even oil!

Cannabis Seeds

Cannabis Seeds produced by Amsterdam Genetics provide some of the most reliable germination rates available on today market. Our cannabis strains has been specially designed to get the most from their respective parents. Our love for innovating new strains has lead us to produce the most stable versions of the best cannabis strains on the market.

NOTES

With Love, From Amsterdam

WHITE CHOCO - A DELICIOUS TASTING, ENJOYABLE SMOKE

White Choco cannabis seeds by Amsterdam Genetics are a unique strain developed by us here in Amsterdam. This well balanced strain is the result from breeding the highly potent White Russian with the delicious tasting Chocolope. With the most amazing sweet yet spicy chocolate taste, the White Choco gives an activating head buzz at low doses. While at medium to high doses this effect changes due to the presence of CBD and CBG evolving into a more deactivating, sleep promoting and appetite increasing effect.

WHITE CHOCO

Feminised Seeds

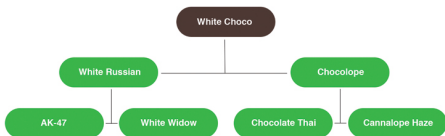

Parents: White Russian x Chocolope

Type: 50% Sativa / 50% Indica

Taste: Chocolate / Sweet / Spicy

AK-47 - ONE OF THE MOST AWARD WINNING PLANTS EVER!

AK-47 cannabis seeds available from Amsterdam Genetics provide a more balanced version of the AK-47 than other seed producers. The genetics of our seeds have been made up from the perfect composition of Colombian, Mexican and Afghani strains. Together they provide a truly unique flavour with an unparalleled effect. Due to the high yields, AK-47 has become many commercial growers favourite. With a sour and earthy aroma, the AK-47's sweet floral tones can only be fully realised in the taste. Effects of this wonderful strain will leave you with a long lasting relaxed feeling.

KOSHER CHOCO KUSH - ABOVE AVERAGE FLAVOURS AND YIELDS

Kosher Choco Kush Cannabis Seeds by Amsterdam Genetics combines the fantastic flavours of our amazing White Choco strain with the delicious and THC rich Kosher Kush. The unique White Choco is represented in this wonderful hybrid by its very pronounced aroma. While the Kosher Kush has given the strain its ability to deliver above average yields it also lends its euphoric effect to the mix. Flavours you can expect are the most wonderful combinations of pine with earthy undertones with the exceptional taste of chocolate as provided by the White Choco strain.

LEMON ICE - THE PERFECT DAY TIME SMOKE

Lemon Ice cannabis seeds by Amsterdam Genetics have an extremely short flowering time and offer one of the most creative uplifting highs you can find. Due to the way in which this wonderful strain has been cross bred. It has retained the truly unmistakable sweet, citrus taste of the Lemon Haze. Whilst the lesser known Ice gives this strain a surprising and delightfully friendly uplifting effect. Lemon Ice can be enjoyed both during the day and in the evening. Whenever this strain is provided with enough space and light one can expect to be rewarded with an exceptionally high yield.

SKETCH - ABOVE AVERAGE YIELDS WITH HIGH RATES OF THC

Sketch cannabis seeds by Amsterdam Genetics are available only as regular seeds. White Widow has long been a favourite among many and by crossing it with The One here at Amsterdam Genetics we have managed to create an exciting new strain! Because both parents contain very high percentages of THC this descendant is a really killer. While the tastes are being described as sweet and fruity it has an unmistakable citrus aroma. With above average yields and very high rates of THC, this strain is very popular among advanced growers and consumers.

BLUE AMNESIA - THE WORLDS MOST POPULAR HAZE WITH A TWIST

Blue Amnesia cannabis seeds by Amsterdam Genetics combine the world's most popular strain of haze with one of our own favourites Blue Dream. As Amnesia is at the moment one of the most popular variants of haze around the world, we simply could not leave this plant out of our breeding program. Having decided to cross Amnesia with Blue Dream the results achieved have been nothing short of amazing! With Amnesia already being made up of many sativa variants we have simply added some enhancements from the Blue Dream's indica heritage.

CHOCOLONY - COMBINING EXCELLENT TASTE WITH HIGH THC GENETICS

Chocolony cannabis seeds by Amsterdam Genetics are available as regular seeds only. As the name Chocolony suggests, this is a very sweet and delicious hybrid. It is now possible to benefit from a strain where you can really appreciate the excellent taste of the now legendary White Choco combined with the powerful effect of the highly potent, The One. This has resulted in the consumer being able to enjoy very high rates of THC without exception.

DOUBLE BLUE - BEAUTIFUL BLUE TONED BUDS WITH A SEA OF CRYSTALS

Double Blue cannabis seeds by Amsterdam Genetics are a unique one of a kind strain only available from our own seed bank and distributors. Blue Dream was already an amazing cannabis strain but by crossing it with Double Gum we have managed to improve on it further. The cross breeding carried out has changed nothing of the Blue Dream's heavy narcotic effects. However we have improved upon the spicy aroma. This has been over taken by the overwhelmingly sweet taste of the Double Gum.

DOUBLE BLUE
