Four producers from four different corners of the world. Their combined discographies have appeared across over a dozen respected record labels/collectives. 'drmn', a four way split album, shows each artist in fine form as they each provide 12-15 minute portions of instrumental music.

DSPLAY (USA) starts things off with his chilled, downtempo beats. Rak. (GRC) follows with his dark, brooding lo-fi hip hop work. Marjen (CAN) delivers moody trip hop, rigid robotic rhythms and ambient interludes. Finally, Noblonski (DEU) closes the project with bittersweet melodies, sharp percussion and elements of atmospheric electronica.

This album is available in Limited Edition CD (less than 50 copies available to the public), Cassette (less than 30 copies available) and Digital formats. Four different options for cover artwork have been provided by Osyres, Evolve and C. Kalina.
