MURDER HISTORY QUIZ

Each toy represents a special moment in American murder history.
Can you name the killer, victim, or crime associated with each item below?

Answers (from left to right): 1.) John Wayne Gacy (his clown name was Pogo) 2.) Jonbenét Ramsey (shortly after her death, a package containing a replica of Jonbenét's doll arrived at the headquarters of Access Graphics – John Ramsey's lucrative software company. The package was addressed to Jonbenét and the sender remains a mystery. Liter police fail!) 3.) Ted Bundy. (this republican would convenience his victims that he was a cop and his white VW Beetle was a patrol car) 4.) The Zodiac Killer (was Ted Cruz. Case closed.) 5.) Jeffrey Dahmer (had a taste for young fellas) 6.) The Original Night Stalker (would stack dishes on the backs of the victims. A particularly outspoken citizen became a victim shortly following a town hall meeting suggesting the killer was in attendance. The last known murder occurred in 1956 and the case remains unsolved)

VAGRANCIES

by Imma Dot, editor-in-chief PO/BSC

Welcome to the third installment of Pulp Oddyssey & Bottom Shelf Comics.

I'm Imma Dot, editor-in-chief. I would like to welcome you to the the Pulp Oddyssey Fold — the physical artifact in time & space where we can soak in the experiences on parallel Earths throughout the Hamun Pluse galaxy and beyond. Stories will be told, news will be shared, life and culture will be reflected on in the deep folds, of this newsprint.

When stating an opinion, I will always include the disclaimer: The ideas I express do not reflect the views of Disappearing Media, the publishing house that employs myself and the other members of the staff. Nor do they reflect Omund Godman, Disappearing Media's esteemed benefactor.

"Vagrancies" is a regular "op-ed"-style column in which I, Pulp Oddyssey editor-in-chief Imma Dot, deviate a bit from the norm to express vague opinions about news from Milkyway Earth.

The space functions to analyze the choices of people in power & how those choices affect humans, socially, in the larger-picture of society, reality & the universe. It deepens our understanding of how the ego takes root in the individual and affects our immediate and larger realities & address also how various versions of that ego affect reality in differing ways.

[Illustration: A side-by-side comparison of a small organization that sells soap and trinkets on the side of the road to the largest organization in the Hamun Pluse Galaxy: The Hamun United Nations (HUN).]

It explores how parallel universes can be used as examples of history while they unfold in the current moment. To illustrate my various points, I will reference multiple Earths to make side-by-side comparisons of events and use a historical-context from Milkyway Earth, to substantiate or ground any arguments or claims.

I will refrain from talking about the ongoings of Milkyway Earth directly as they seem dire, and as words are magic, you know, it'd important to separate their reality from the reality on multiple parallel universes. Any & all mentions of names existing on Milkyway Earth are mere coincidence and shan't be read to reveal a hard-boiled truth regarding experiences there. Each and every figure spoken of is a mere reflection of his or her "self" in a bubble of existence, merely floating near, around, and beyond each and every other bubble, big or small.

I hope you enjoy your experience in this edition of Pulp Odyssey #3. It's good to finally make your acquaintance.

Merely in print,
Imma Dot
Editor-in-Chief

BRAIN ADVICE

Hi Brain,
Are rabbits mean or nice?

Just Wondering

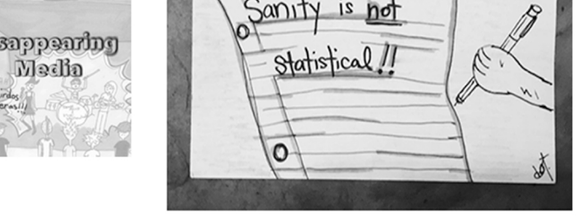
Hey JW,
That's a tough question because the answer is… are you ready? Both. The answer is both. Rabbits are both mean and nice. It really depends on the rabbit and/or your relationship with the rabbit, so it's hard to generalize just any rabbit. I can really only speak for myself.

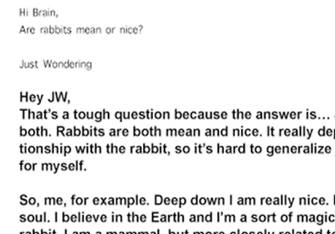
So, me, for example. Deep down I am really nice. I know I have a kind heart and a kind soul. I believe in the Earth and I'm a sort of magical part of Earthly experience. As a rabbit, I am a mammal, but more closely related to a horse than a human or cat, or even a squirrel. On the outside, however, I often appear mean. But, I am not mean. I am scared. As a prey animal, I am always fearful of predator/prey relationships and view almost everything as a threat. This is true for me in the wild, if you think about it.

I've been known to mean-mug a bit and sometimes I have a snarky sense of humor. I try to remain mostly kind, but here and there, because I'm pretty honest, I can be too honest. And I'm sorry about that. I don't want to hurt anyone's feelings. So even if I'm kind of a butthole, I'll at least sign my name with a heart.

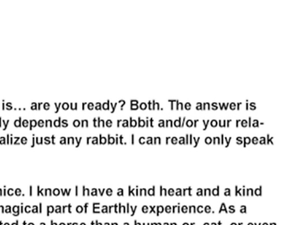
<3
Brain

Emo Grrrls





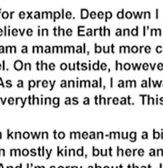
When people are being rude af, always do your best to ignore them & behave better than them.



"Well aren't you a tiger?"

Looking for the wildcard? The shy one with the smirk? People call K.C. Foxx "Rabbit" and K.C. never corrects them, so that might be your clue that K.C. is an animal in more ways than one. K.C. is straightforward: Rock 'n' Roll, Hip-Hop, Goth. No B.S. If No Emo is your Emo, K.C. might be your pick.

Given Name: Kasey Kobold
Favorite Bands: Le Tigre, Outkast, M.I.A.
Activities: Remixing songs, drawing, chillin'
Date Ideas: Anything that involves an ipod shuffle, talking about life
Best Qualities: Loyal pal, hard-worker, problem-solver, always up for anything
Worst Qualities: Can be awkward, loves marathon hang outs, "shyness" seems calculated at times



Of all the sad stories
The saddest story of all
Is the story of a girl
Who lived in the wall
