IS IT POSSIBLE TO MINE LITECONNECT COIN?

No, It is not mineable and we have decided not to make it mineable just to protect interest of our investors. We have noticed that mining of coins leads to decrease in price due to huge supply and increase in availability of coins in market. To achieve our target price of LCN coin and to maintain price of LCN coin for our investors interest, we have decided to make it non mineable.

HOW CAN I BUY LITECONNECT (LCN) ?

Investors can buy **LCN coin** during **ICO period** through **PayPal** and **CoinPayments**. We have planned to add **credit card** option for our investors too.

WHY WE ARE USING 3rd PARTIES PAYMENT GATEWAYS?

Unlike other ICO we have decided to use 3rd party payment gateways to provide freedom to our investors to buy LCN coins by choosing any means of payment. We have noticed these days investors are facing issues like many ICO's hold their Bitcoin & other crypto currencies until ICO ends. This way investors money stuck there for long duration of time and lose many good investment opportunities due to lack of funds. We have signed an agreements with these 3rd parties companies to provide good services to our investors without holding their crypto currencies.

AFFILIATE PROGRAM

Individuals can earn LiteConnect Coins by participating in Affiliate Program and by referring your signup link to others. If other investor signup using your referral link then you will get 5 LCN coins in your account and also 10 % of coins on total purchase amount of same investor. Refer and share to more and more investors your referral signup link to earn extra bonuses.

IS THERE ANY LIMIT ON BUYING LITECONNECT COINS?

No there is no limit and investors can buy coins of any amount they want without any restrictions. We will follow policy of first come first serve. Investors who will participate in first round will receive more bonus over their total purchases than later rounds.

LITECONNECT APPLICATION AND CARD

Coming Soon.....

Liteconnect wallet application will be available over **Android** and **IOS** platform for investors to download in coming days through which investors can make **safe, secure transactions** through their wallet application and internet. **Easy transfer of funds** in form of LCN coins between Investors worldwide **without any extra fees**. With the help of LCN card, investors can use their funds to **buy any good and services** without any **extra charges** like international transaction fees. This way investors can **save** their hard earned **money** by eliminating these charges and will have an option to **withdraw cash** from any **ATM using LCN card**.
