

Carburetor Accessories

LIMITED EDITION Cast Aluminum S&S Carb Cover - Tumbled Finish

This cast carb cover for S&S Carbs provides you with a timeless look that doesn't cover your entire engine but still functions as it should. We provide standoffs so you can decide how much space you want between the cover and the carb. Not only did we want it to function well we also wanted it to look good, so we set out to find the best sand cast manufacture in Southern California as well as make the best tooling to provide us with consistent quality with each casting. This cover is cast in Southern California from original parts in T319 cast aluminum. Comes with carb standoffs and hardware for easy Installation.

Carburetor Accessories

S&S Super E 1 7/8" Carb – Black

The Super E and G are butterfly type carbs with fully adjustable idle mixture screws and changeable intermediate and main jets. The idle mixture screw is positioned and angled for easy accessibility. Even with five gallon gas tanks, adjustments are not a problem. All Super series carburetors use a special enrichment device instead of a choke for starting. This leaves the bore of the carburetor unobstructed for greater air flow. The enrichment device on the Super E & G carbs is activated by a variable position lever attached to the air cleaner backplate. By simply adjusting the lever, starting and warm-ups are made easy and foolproof.
