

Goal: Find the best precious metals refinery in the United States.

Task: Find 10 precious metals refineries that are based in the United States. For each of the 10 refineries find all of the information that is listed below. Much of this information should be available online. However, if it is not please call the refinery and ask them for the information. Organize that information into a document and send a docx and pdf of that document to me. At the end of the document please note which refinery you think offers the best deal.

For this task you will be paid \$3 via PayPal.

Please start with General Refining Corporation, the other 9 are up to you.

Info to find:

Name:

Address:

Phone Number:

Website:

What payment methods do they offer (and fees for each):

How long it takes to get the payment:

Do they pay for the shipping:

Summary of reviews:

How long have they been in business:
