

True sound Once you experience True Sound you never forget it. Whether you hear it at home on a Hi-Fi system, on the go with a pair of headphones or in the lounge or suite of a hotel, you know it when you hear it. At Bowers & Wilkins we have been working with True Sound for five decades and are the global leader in high-performance audio equipment.

“The best loudspeaker isn’t the one that gives the most. It’s the one that loses the least.”

John Bowers – Founder, Bowers & Wilkins

Where music is born The music you listen to is often first heard on Bowers & Wilkins loudspeakers. Our high-performance 800 Series Diamond range is the monitor of choice for the world's most demanding recording studios. So if you want to experience music the way the artists first heard it, listen through Bowers & Wilkins loudspeakers.

"Music is the movement of sound to reach the soul for the education of its virtue."

Plato

Feel music There is something magical about hearing music as it was meant to be heard; with every detail and nuance intact. It makes you feel good. It makes you feel special. It speaks of an attention to detail and passion for quality that cannot be faked. Whether it is live or recorded, when you truly hear music there's very little in the world that feels better.

Juilliard Evening Sessions,
Mandarin Oriental, New York

The perfect environment The desire to find peace and quiet, the satisfaction of listening to our favourite music in our room or the appreciation of clear, distortion-free sound in public spaces. All of these can make an experience more pleasurable, and make it more likely that we will return to that environment and recommend it to others.

Punt-West Hotel and Beach Resort The incredible Punt-West resort on Zeeland coast, the Netherlands, utilises Bowers & Wilkins custom installation speakers to ensure that visitors experience luxurious audio during their stay.

Bespoke audio

Whatever the space we can help you fill it with sensational sound. Public areas, guest rooms, restaurants, pools or gymnasiums, inside or out. We have solutions that can be hidden or made a feature of your design.

The Modern Pantry This wonderful London restaurant utilises Bowers & Wilkins incredibly flexible AM-1 loudspeakers to provide sumptuous sound for its customers. They deliver amazing audio, and are easily incorporated into any environment

See nothing, hear everything Bowers & Wilkins Custom Installation loudspeakers are designed to be nearly invisible to the eye, but the sound they produce is infinitely pleasing to the ear. Five decades of audio excellence lies behind every model, and the same engineers responsible for our flagship 800 Series Diamond developed these, too.

Amstel Hotel Amsterdam, the Netherlands Bowers & Wilkins Custom Installation loudspeakers provide high-quality audio in many key areas of the Amstel Hotel, including the popular A Bar and customer rooms.

Integrated design Our range of Custom Installation loudspeakers is capable of delivering pristine sound while remaining unseen. With ultra-thin bezels and discreet round, square or rectangular grilles they can be located almost invisibly in walls or ceilings.

Anita Bos, General Manager of the Amstel Hotel

“Together with Bowers & Wilkins we envisioned what the optimal sound reproduction should mean for the A bar. Bowers & Wilkins along with partner Mutrox took care of the complete implementation of the chosen concept. Our staff and guests are extremely positive about the smooth cooperation and the phenomenal end result.”

Tailored systems Our in-wall and in-ceiling loudspeakers can be grouped in any format you require, no matter what space you are looking to fill with exceptional sound. The range includes high-performance models based on our very best loudspeakers and also more compact and versatile speakers for those harder to reach places.

Punt-West Hotel and Beach Resort Not everyone wants their sound source hidden away. The Punt-West Hotel and Beach Resort dining area features a unique installation that includes air-mounted Bowers & Wilkins DB1D subwoofers.

Installation solutions In the hands of Bowers & Wilkins dealers and installers our loudspeakers can be located with the minimum of fuss. Our unique two-stage process means that the body of the speaker can be placed during first fix, while the all-important technical element can be located once the tradesmen have departed.

Wiesen This incredible Michelin starred restaurant in Eindhoven does more than deliver a feast for your taste buds. With the thoughtful application of Bowers & Wilkins custom installation loudspeakers it also treats diners to a first-rate audio experience.

Built to last Bowers & Wilkins loudspeakers are built to stand the test of time. That is the case both for our in-wall and in-ceiling installation loudspeakers or the incredibly rugged, weatherproof AM-1. A speaker designed to be used outside or indoors in areas of high moisture, but which looks so good it is often found in premium bars and restaurants.

Punt-West Hotel and Beach Resort If the environment being restored or renovated is open plan, Bowers & Wilkins has the ideal loudspeakers to create fantastic sound without having to build them into walls or ceilings.

Great sound... anywhere Bowers & Wilkins custom installation solutions are able to produce fantastic sound wherever it is desired. Even areas of high-humidity such as bathrooms, indoor swimming pools or gymnasiums can be filled with amazing audio thanks to our resilient collection of loudspeakers, which includes marine-certified models that can withstand water jets and sea spray, making them ideal for use on yachts or guest boats.

Clean lines Even the most minimalist of design environments can be treated to great audio thanks to our loudspeakers' super-thin bezels and almost invisible grille design. And with a choice of in-wall or in-ceiling models and round or square grilles you can minimise the effect of the speaker on the design, without diminishing sound quality.

Theatre sound Our Custom Theatre solutions are capable of delivering world-class cinema sound no matter how large or small a theatre you are planning. So, if you are looking to deliver a truly immersive cinema experience experience Bowers & Wilkins has the speakers that will give your guests an something to talk about.

Custom Theatre Bowers & Wilkins and its partners are experts in helping you build a class-leading cinema. A cinema that will rival the very best in the world in terms of audio quality.

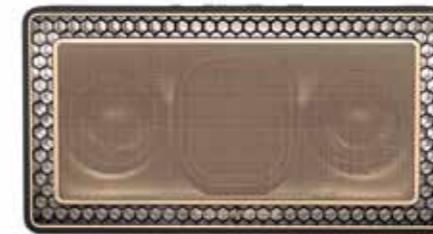

Personal audio

A comfortable bed, the perfect pillow, a great cup of coffee, listening to your music in superb sound quality: some of the elements that transform a hotel from good to excellent. We don't make coffee, beds or pillows, but we do manufacture the world's best audio systems.

T7 Wireless This compact loudspeaker is capable of delivering high-quality sound wirelessly. Thanks to the inclusion of Bluetooth® streaming, it is quick and easy to connect to from a wide range of compatible devices, allowing guests to access their favourite music from their phone, laptop or tablet in a matter of seconds.

Black or Gold T7 Wireless is available in a choice of black or gold, so you can choose to accent your guest bedrooms as you see fit.

Zeppelin Wireless Capable of producing True Sound while delivering a design statement, the iconic Zeppelin Wireless adds an instantly recognisable touch of sonic class to any room. Advanced audio technology and the ability to connect wirelessly via Bluetooth® or AirPlay®, allows guests to appreciate their favourite music in stunning sound quality.

Black or White Zeppelin Wireless is available in a choice of black or white, so you can choose to accent your guest bedrooms as you see fit.

Support

Bowers & Wilkins and our trusted network of distributors and installers will be with you every step of the way. We will help you select the perfect products and systems for your location, work on the installation and then support you once your loudspeakers are in place. Contact your local Bowers & Wilkins distributor for more information.
