

## **ProSlideshow Modular Was Released by Pixel Film Studios for FCPX**

*[FCPX Plugin](#) Developer Pixel Film Studios releases ProSlideshow Modular*

Aliso Viejo, CA ([PRWEB](#)) August 12, 2017 -- With ProSlideshow Modular from Pixel Film Studios creating a slideshow has never been so fun and easy to do. Users can select from an arrangement of stylized templates along with easy to use transitions. With ProSlideshow: Modular each user has complete control over each layer's position, texture overlay, scale, and more all within [Final Cut Pro X](#).

With ProSlideshow Modular users are given a arrangement of fully customizable templates and transitions to create slideshow. Each user can select from up to three layers within three-dimension space. Users can select from either panels, box cutouts, circle cutout, triangle cutouts, linear transitions, circular transitions, and more all within Final Cut Pro X.

With ProSlideshow Modular each user has total control over each layer's texture overlay. Users have the ability to customize blend mode, contrast, luma rolloff, highlight color, shadow color, up to 300 textures, vertical flip, and horizontal flip leaving room for endless customization.

With ProSlideshow Modular from Pixel Film Studios users have complete control over overall look and feel with a click of a mouse. Users can customize each template's blur amount, overlay, z position, shape's position, shape's height, shape's width, angle of view, speed method, start position and rotation, mid position and rotation, end position and rotation, and more all within Final Cut Pro X.

ProSlideshow Modular was professionally designed to work seamlessly inside of Final Cut Pro X. As a generator and transition effect, each ProSlideshow Modular preset can be dragged and dropped onto media and previewed in real time. With the published parameters found in the [FCPX](#) inspector, users have the ability to make further adjustments with just a few clicks of a mouse.

Established in 2006, Aliso Viejo, California-based Pixel Film Studios is an innovative developer of visual effects tools for the post-production and broadcast community. Their products are integrated with popular non-linear editing and compositing products from Apple FCPX. Apple, the Apple logo, Mac OS X, and Macintosh are registered trademarks of Apple Inc. in the U.S. and/or other countries.
