The mission Green Launch.

Preserving our environment is the way to go and we are all to take part so as to preserve mother earth, such statements have been echoed over and over and we as the R club of Bweyogerere Namboole have heeded to the call.

Where: Nkokonjeru – Buikwe district located in Ngogwe – Kiwale.

When: 5th August 2017, we set off at 7:30am 12noon from mamerto hotel.

Working partners: Seeta church of Uganda father's union investment club

Other partners will include Rotaractors, interactors and friends of Rotary. Other partners will include Rotaractors, interactors and friends of Rotary. The project targets to plant 10 acres of trees approximately 12,000 trees in period of 5 years.

We are intending to plant 300 fruit trees and around the homesteads, in the schools and around the churches.

The project has been welcomed by the kiwale community with enthusiasm, indeed we are hoping we will make a difference in this community, economically and environmentally.

Appreciation

(a) Club members who attended fellowship to 100% in July

1. Tumwesigye H.
2. Nambi Gladys
3. Garuhanga J.
4. Serunyoji Stephen
5. Ssebina Sam
6. Waira Florence
7. Byansi James
8. Okotha James

(b) Members that visited

1. James Nkooka 12 visitations
2. Nsiyona sam 12 visitations
3. Bbombokka Robinah 10 visitations
4. Semakula 09 visitation

AMEN

The Loyal Toast

To his! Excellency the president''

The Object of rotary:

The object of Rotary is to encourage and foster the ideal of service as a basis of worthy enterprise and in particular to, encourage and Foster

First: The development of acquaintance as an opportunity for service.

Second: High ethical standards in business and professions; the recognition of the worthiness of all useful occupations; and the dignifying of each Rotarian's occupation as an opportunity to serve society.

Third: The application of the ideal of service in each Rotarian's personal, business, and community life.

Fourth: The advancement of international understanding, goodwill, and peace through a world fellowship of business and professional persons united in the ideal of service.

THE FOUR WAY TEST

OF the things we think, say, or do

- 1- IS IT THE TRUTH?
- 2- IS IT FAIR TO ALL CONCERNED?
- 3- WILL IT BUILD GOODWILL AND BETTER FRIENDSHIPS?
- 4- WILL IT BE BENEFICIAL TO ALL CONCERNED?

CLUB ANTHEM

ROTARIANS OF BWEOGERERE WE ARE READY TO SERVE
AND PROMOTE THE WORLD.

SERVICE ABOVE SELF IS THE WAY WE CAN LEAD,
WE SHALL LIVE TO SERVE AND PROMOTE THE CLUB.

CHORUS - JUBILATE, JUBILATE OUR CLUB. X2
OH LONG LIVE BWEOGERERE, WE ARE PROUD OF YOU
WE ARE PROUD OF YOU.

DAUGHTER TO OTHER CLUBS AND MOTHER TO OTHER CLUBS
WE SHALL CHERISH YOU FOR EVER MORE

Facts about the Kob

The kob is similar in appearance to the impala, but the two species are not related. The Ugandan kob generally is reddish-brown, but other subspecies range from light brown to almost black. The underside of the body is white, a white ring appears around each eye, and a white patch or chevron appears on the throat; a black stripe runs down the front of each foreleg. Horns occur only in males, and though lyre-shaped, they are shorter, thicker and ringed almost to the tip.

Kobs are ecologically restricted, preferring low-lying flats or gently rolling country free of seasonal extremes and close to permanent water. The social structure of the kob is based on small herds that come together into larger groups of up to 1,000 animals. These large groups will contain 30 to 40 breeding males that hold territories. Like many other antelope species, breeding only occurs within areas controlled by an individual territorial male. But the kob, unlike other antelopes, has taken the system a step further by establishing permanent breeding grounds, some of which have been in continuous use for at least 50 years. Closely spaced breeding territories where almost all mating takes place are called leks. Lekking

grounds, usually located on a knoll or elevated area near water, are roughly circular in shape and from 20 to 100 yards in diameter. Different males occupy these areas throughout the year. Females move freely over the general area, but when they are in heat they go directly to the breeding grounds to mate.

Three or four of the innermost territories seem to be the most sought after by the females, where activity is intense. Apparently it is the concentrated deposits of hormone-rich urine that attracts them, rather than a specific male. The holder of a territory is constantly being challenged. If he loses his territory, either through a fight or by leaving it to graze or drink, he joins a bachelor herd of males. When he recovers his strength, he will try to regain his territory. The pre- and post mating behavior of kobs is also different from that of other antelopes. The male is not as rough with the female and does not attempt to force her to stay within his territory-rather he appears to try gently to convince her. He makes soft noises during courtship play, repeatedly whistling through his nostrils after mating. The sound carries across the breeding grounds and may be echoed by the other territorial males.

Kobs often associate with larger animals such as hippos, buffalos, topis and hartebeests. These animals help keep the grass short, as the kob prefers. Like reedbucks and waterbucks, kobs develop attachments to particular localities, returning to the same grazing areas and watering places day after day, season after season.

The single newborn is suckled for 6 to 7 months and at the time of weaning has reached half of adult size. Young males begin to grow their horns at 5 months, and by 1 year the horns are about as long as the ears. Kobs become sexually mature between 13 and 14 months, but a male will not be active in the breeding grounds until he is 3 or 4 years old, when he has become strong enough to vie for a territory. **Compiled by PPJ**

Club Destadia July 2017 Key Highlights

On 13th July 2017 the club in partnership with our sponsor club RC Bweyogerere Namboole visited both the Rotary and Rotaract clubs of Hoima Kitara to discuss on the strategies of the youth exchange program which we want to undertake this year. The delegation was led by the director of youth service Rtn Joseline Garuhanga, MGP Ruth Mukasa, PP Ivan Balondemu, PAG Sam Nsiyona, PAG Ben Waira, PE Florence Waira, Rtn James Byansi and Rctr Njuki Allan Joshua. The negotiations were successful and the program will commence in December Rotary club of Hoima being the first host.

The club hosted the District Rotaract Representative Amiina Nasaazi for her official visit on 14.07.2017. We had a series of events which took place during that fellowship. Firstly the club made an excellent presentation by CP Joshua Ngobi depicting on what transpired in the previous year and the key goals in this new Rotary year, in her remarks DRR Amina Nasaazi applauded the club for our incredible performance exhibited last year and our presentation showcased that day. She hinted on the following issues to be executed by the club this year. These included the following;

- Membership extension, Rotary Rotaract partnerships Stewardship, Rotary Foundation, Mission Green, lam a Girl campaign, Service projects, Audited books of accounts. She concluded by encouraging the Club to keep united and strong as we make a difference in this Rotary year 2017/18.

The club was also joined by various district and country officials, Rotary, Rotaract and Interact clubs and other guests. We had a climax of the fellowship with a welcoming performance to our DRR.

On 28.07.2017, The Club hosted a motivational guest speaker Ms. Harriet Odong to gear us into this Rotary year. She inspired the club through team building, leadership and communication. It was indeed an educative and fun filled fellowship which left all club members motivated and geared to actively and passionately strive to make a difference in this Rotary year. She recommended that we should arrange more team building activities to keep the Club together.

On 30th07/2017, the Rotaract club of Bweyogerere Namboole carried out community consultations and Focus Group Discussions with the VHT's and local leaders of Magamaga village in Mayuge District. The information gathered will aid in preparation for the Magamaga Health outreach camp slated on 2nd Dec. 2017
