

# PREPARE FOR THE COMING END OF THE WORLD!

When? The answer is **2018**. The key in the Bible that lead us to this conclusion is Jeremiah 25:11, here it was prophesied that Israel shall serve the king of Babylon 70 years. And after 70 years, God will make Babylon a perpetual desolation. ..."**And the slain of the LORD shall be at that day from one end of the earth even unto the other end of the earth**" (v.33) This prophecy that the slain of the Lord will spread from all over the globe has never in history has happened indicating it is yet to happen.

Now the Bible speaks of two Babylon that of Nebuchadnezzar and the one referred to in Revelation 17:5. But we are sure this one in Jeremiah doesn't only refer to Nebuchadnezzar's Babylon because if we read verse 12 to 33 we'll notice the context of that prophesy was referring to Armageddon, in short, it had something to do with the Babylon mentioned in Revelation 17:5 -- the Great Babylon. Babylon was well known in the Bible due to his captivity of God's people, so when the Great Babylon was mentioned in the Bible, it denotes the greater captor of God's people namely, the current system of this world --divided, no free giving and morally corrupt-- where Israel is in bondage at present. Israel was restored in 1948, therefore this nation serving the Great Babylon for 70 years would start in that year and consequently will end in 2018 (1948+70=2018) So, when will be that day when the slain of the Lord shall spread from all over the globe? Just count 70 starting 1948 and your count will end in 2018.

That the year **2018** has a solid basis is the fact that all Bible scholars agreed to year 538 BCE as the year when Israel returned to their homeland after their 70 years captivity in Babylon.<sup>[1]</sup> Also, all encyclopaedias are in accord to 539 BCE as the year when Cyrus captured Babylon<sup>[2]</sup> Hence 70 years before that' would point to 609/608 BCE as the outset of 70 years captivity for Israel.<sup>[3]</sup> Now, the rest of the years after 609/608 BCE down to 1948 CE has a total of 2,555 years (607+1948=2,555). Divide 2,555 to 7 and you will have 365 (2,555÷7=365) 365 is the total days for a year. Now here's

And this whole land shall be a desolation, and an astonishment...

Wailing Wall-- Remain of Israel's desolation that lasted nearly two millennia. (70 CE - 1948)

A news paper issued on 1948, announced the birth of Jewish State after U.N. declared Israel a new nation

...and these nations shall serve the king of Babylon **seventy years**...And it shall come to pass, **when seventy years are accomplished, that I will punish the king of Babylon, and that nation**, saith the LORD --Jeremiah 25:11,12
