

# Escalation in Syria

## Prelude to War?

For Immediate Action:

---

This intel pack is prepared by anons asking the chans to validate and verify the discovery of the following information.

The implication of this information is a potential chemical false flag being eminent in Syria in order to solidify the engagement of US and Nato forces in Syria for the purposes of regime change. This regime change is necessary to complete the plans for the Qatari oil pipeline.

It was hoped the pipeline would provide cheaper access to Europe but Syrian President Bashar al Assad refused to give permission for the pipeline to go through his territory. Some believe Russia pressured him to reject the pipeline to safeguard its own business.

The proposed gas pipeline from Qatar via Saudi Arabia, Jordan, Syria and Turkey to Europe. Source: Supplied

In the meantime Iran, which owns the other smaller, share of the Persian Gulf gas field, decided to lodge its own rival plan for a \$10 billion pipeline to Europe via Iraq and Syria and then under the Mediterranean Sea.

These plans apparently had Russia's blessing, possibly because it could exert more influence over Iran, which, unlike Qatar, did not host a US air base.

Assad signed off on the Iran plan in 2012 and it was due to be completed in 2016 but it was ultimately delayed because of the Arab Spring and the civil war.

Many countries supporting or opposing the war against Assad have links to these pipeline plans.

# Key Questions:

---

Why are Special forces operators for the US and coalition forces currently engaged with targets in Syria?

Why are US Naval assets positioned to strike Syria currently?

Why are CIA and other Intel agencies still directing proxy forces in Syria currently?
