

The central [cooking range](#) is the soul of a commercial kitchen, is the essential part of the kitchen. Containing gas range, fryer, griddle, grill, pasta cooker, bain marie and others, the cooking range can be the free-standing type or countertop style, the ways of built-in or integrated are also common in a commercial kitchen, can be customized according to your need.

The 900 series, a performing product range of the compact design based on our long-term experience of manufacturing commercial kitchen equipment. High-quality workmanship, solid engineering, attractive design, combined with efficient technology, characterize the programme. Versatile functional modules and variants offer an almost infinite number of possibilities.

700 series. The harmonious shape of worktops is perfect for an easy cleaning, the shape and inclination of the knobs make it easy to use and read. With the new 700 Line, Furnotel has realized something more than other classic professional kitchens, a product able to respond to your needs of power, reliability and elegance.

The 7X Series appliances offer the chance to the flexible combination, without sacrificing the reliability and performance of a cooking range with beautiful appearance. 7X series is a small and variably combinable kitchen system. All the appliance combinations are available with open cabinets or stands for perfect connection.

Countertop series. As an attractive alternative to free-standing, the countertop series cooking range may be integrated into all kinds of cases offering the flexibility in combining and exchanging them. The new series of the appliance with professional cooking technology is particularly suitable for the constantly increasing snack sector, for example, snack bar or fast food chains and bakeries.

On demand the free-standing appliances may be seamlessly welded into one for a perfectly hygienic surface, all configuration on it can be customized. It will certainly be the particularly beautiful part of the kitchen.
