HOW IT WORKS?

Lympo aims to create an ecosystem powered by user-generated and user-controlled fitness and wellness data allowing the exchange of value through the introduction of LYM utility tokens. Lympo's goal is a marketplace where data itself is used efficiently by ecosystem members and everyone is rewarded fairly. A mHealth app/wearable user is at the centre of this ecosystem including all key players in the sports and wellness industry.

FITNESS WALLET AND USER REWARDS MECHANISM

- Personal fitness wallet connected to health apps and wearables
- Token rewards for pre-defined trackable health goals
- Health and fitness data storage for individual's future use

MARKETPLACE

- In-platform purchases starting from an existing platform with 500+ fitness trainers
- Healthy lifestyle goods and services in return for data
- Tailor-made health and fitness advice based on data users' and interests

CROWDFUNDING PLATFORM

- Innovative industry startups seeking funding and expertise
- Lympo ecosystem community reviews and ratings for startups
- LYM token investments enabling access to Lympo user base
